Supplementary material for Andersen A. G. et al. A method for evaluation of proton plan robustness towards inter-fractional motion applied to pelvic lymph node irradiation. Acta Oncol 2015; 54: 1643–1650.

Supplementary Figure 1. WEPL variation (mm) maps for the right LN of all three patients. Couch and gantry angles were covered in 5° steps.

Supplementary Figure 2. WEPL variation (mm) surface map for the right LN of all three patients (patient number 1–3 from left to right). Couch and gantry angles were covered in 5° steps.

More supplementary material for WEPL variation maps and dosimetric parameters using different margin configurations are available at: (http://users-physics.au.dk/andreasg/supplementary_material).
