Abstract

A new iridoid diglucoside has been isolated from an aqueous extract of *Harpagophytum procumbens* secondary roots, together with 6 known compounds. Its structure has been assigned as 6'-*O*-glucopyranosyl-8-*O*-*trans*-coumaroylharpagide by spectroscopic means.

Keywords: Pedaliaceae; *Harpagophytum procumbens*; iridoid glucosides; 6'-*O*-glucopyranosyl-8-*O*-*trans*-coumaroylharpagide; harpagoside; phenylpropanoid glycosides.
