Appendix S1: List of bird species recorded in Akagera National Park. Taxonomy follows the IOC World Bird List version 3.1 (Gill and Donsker 2012) with additional information provided by Vande weghe and Vande weghe (2011) and Stevenson and Fanshawe (2009). Frequency = number of plots in which a species was observed (total number of plots $n = 228$). Occurrence: BW = Palearctic migrant and winter visitor^a, CR = common resident, AM = Afrotropical migrant^b, O = accidental species (species that rarely or accidentally occurs in Rwanda), V = vagrant. IUCN Red List categories follow BirdLife International (2012a, 2012b): EN = Endangered, VU = Vulnerable, NT = Near Threatened, LC = Least Concern. (* = uncommon breeding resident)

^a Palearctic migration flyways connect Africa to Europe, Northern Asia and Arabia and Northern Africa; species migrate to the Southern Hemisphere during the northern winter months, e.g. September-April.

^b Afrotropics are home to species that only move within the continent and those wondering around the continent.
