B

Supplementary Figure 11. Luminex analysis of chemokine/cytokine secretions. A, Luminex analysis of culture medium from KP cells with or without *Asf1a* KD harvested 30 hours after the cells are seeded. **B,** Luminex analysis of culture medium from KP control tumor tissues or *Asf1a* KO tumor tissues with or without anti-PD-1 treatment in MDOTS assay. Culture medium was harvested 3 days post-treatment. Heat maps represent relative fold change.
