

Appendix

A.1 Rural Urban Continuum Codes; Source: U.S. Dpt. of Agriculture, 2013

Code	Description
Metropolitan	
1	Counties in metro areas of 1 million population or more
2	Counties in metro areas of 250,000 to 1 million population
3	Counties in metro areas of fewer than 250,000 population
Intermediate	
4	Urban population of 20,000 or more, adjacent to a metro area
5	Urban population of 20,000 or more, not adjacent to a metro area
6	Urban population of 2,500 to 19,999, adjacent to a metro area
7	Urban population of 2,500 to 19,999, not adjacent to a metro area
Rural	
8	Completely rural or less than 2,500 urban population, adjacent to a metro area
9	Completely rural or less than 2,500 urban population, not adjacent to a metro area

A county is classified as Metropolitan, when it is part of a Metropolitan Statistical Area (MSA). MSAs represent unified labour markets, where each MSA contains a core urban area of at least 50,000 population in one or more core counties, including adjacent counties with a high degree of integration with the urban core. A county can be classified as metropolitan even if it is rural in character. Metropolitan areas are based on the Office of Management and Budget (OMB) delineation as of 2013.
