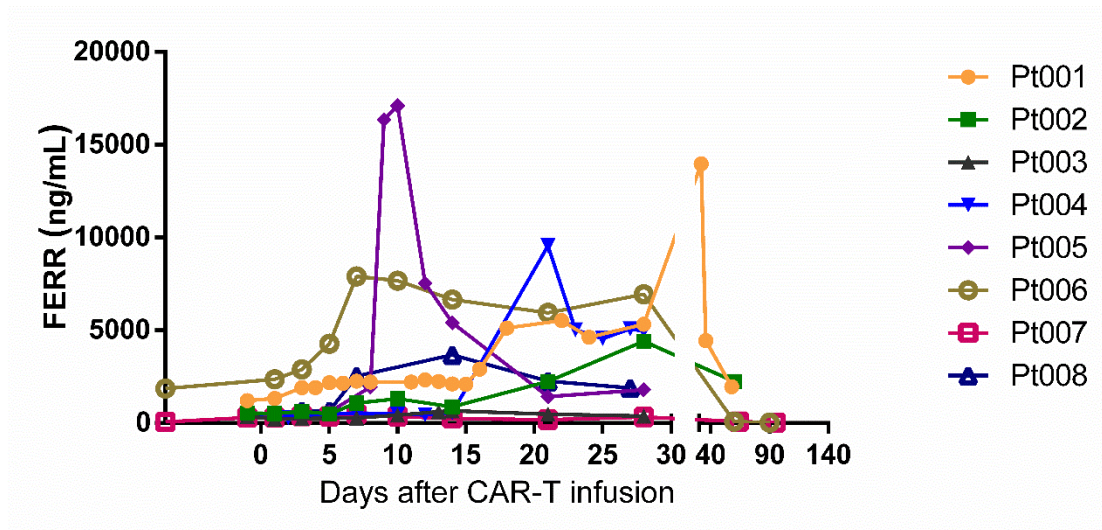

Figure S6. Serum cytokine measurements after CD7 CAR T cell infusion

(A) Serum IL-2, IL-6, IL-8, IL-10, TNF, IFN- γ , GM-CSF and IL-1 β levels as determined by cytometric bead array in eight patients. (B) Serum levels of CRP in patients before and after CAR T cell infusion. (C) Serum granzyme B levels increased and were retained within the scope of standard values for most time points. (D) Serum ferritin levels before and after CAR T cell infusion.
