

Fig. S5

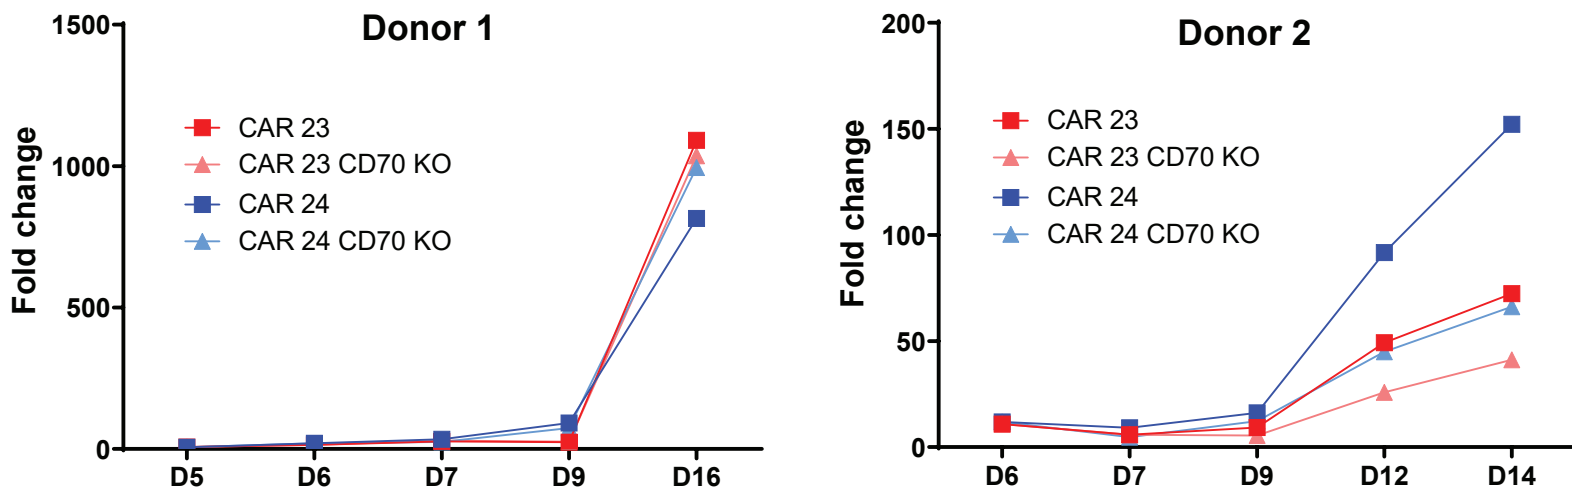

Figure S5. Expansion of CAR T cells with and without CD70 KO. Anti-CD70 CAR T cells were generated in two unique donors, either with or without CD70 knockout (KO) by TALEN gene editing. In both donors, CAR T cells were successfully generated and expanded over a period of 14 to 16 days, with expansion in the CD70 KO cells being equivalent or slightly lower than the non-KO counterparts.
