

Table S3: Rotated (direct oblimin with Kaiser normalization) factor matrix for the Parental PSE Scale (N= 135).

Response Items	Rotated Factor Loadings	
	1	2
I know how to get my child to listen.	0.8	0.466
I am able to manage my child.	0.793	0.346
I am able to help my child cope when they have a problem.	0.657	0.519
I know how I can help my child when he/she is sad.	0.652	0.371
I know what to do when child is worried.	0.621	0.472
I know about how my child's language will develop.	0.353	0.694
I feel confident in developing my child's early language and literacy skills.	0.511	0.685
I feel confident to develop good problem solving skills in my child.	0.65	0.677
I know about how my child will learn at school.	0.322	0.671
I can help my child learn to read and write.	0.418	0.665
I feel ready to help my child with schoolwork when the time comes.	0.468	0.506
Eigenvalues	4.95	1.36
% of variance	45.01	12.35
Cronbach's Alpha (for subscales items only)	0.82	0.85

NB: Factor loadings on items included in the two subscale calculations appear in bold.
