Dear Ben

Investigating the impact and feasibility of a mobile mindfulness-based digital intervention for patients with asthma (MOMA)

This is to inform you that your recent application for SPCR FR13 funding **will be supported** by the department. Each application was considered by 2 independent reviewers and scored by them. The 2 sets of scores were added together and you can see the comments and scores on the attached reviews.

Once you have made any changes that you would like to please remember to submit your completed final application by 31st October.

Please also send a copy to Judy for her records.

Your applications will be sent out for external review and then will be discussed by the SPCR Board on 8 December who will confirm the funding after that.
