

## And the Trade Wars Rise, and the Energy Security Decline

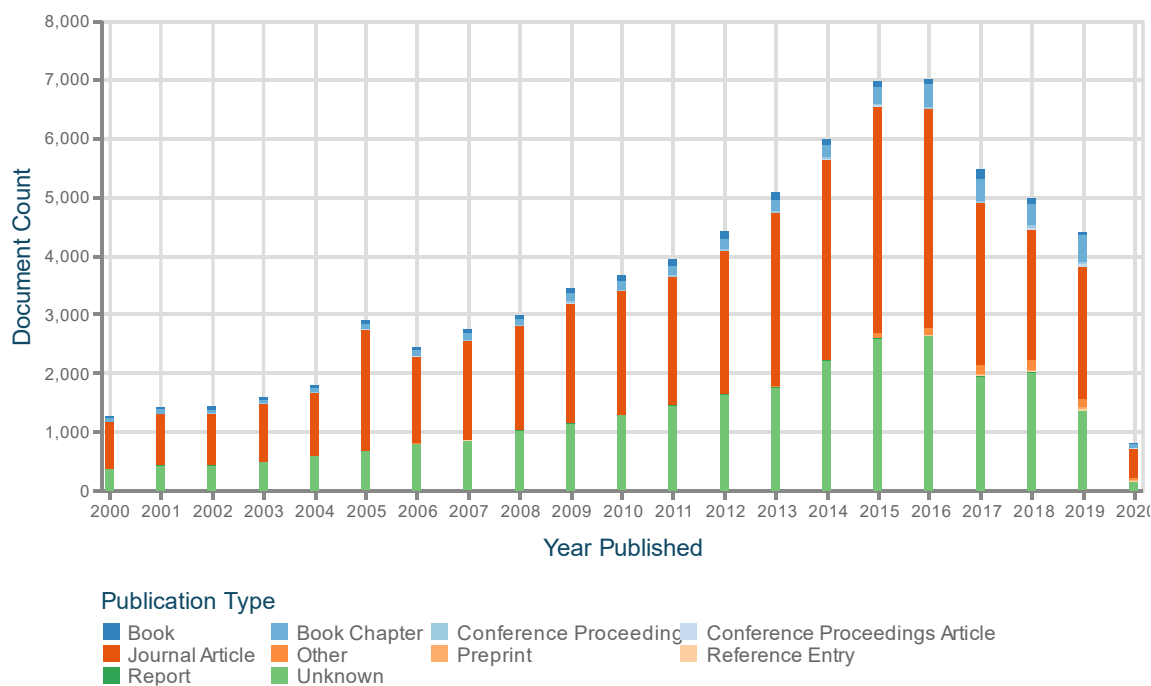

Short bibliometrics analysis to illustrate the hypothesis: authors decline attention on “Energy Security” theme and focus on “Trade Wars” topic. Sanctions are the specific type of trade wars. When the trade wars start, the topic “Energy Security assessment” lost authors attention even more then “Energy Security”.

You just need to meet more hot challenges — the trade wars.

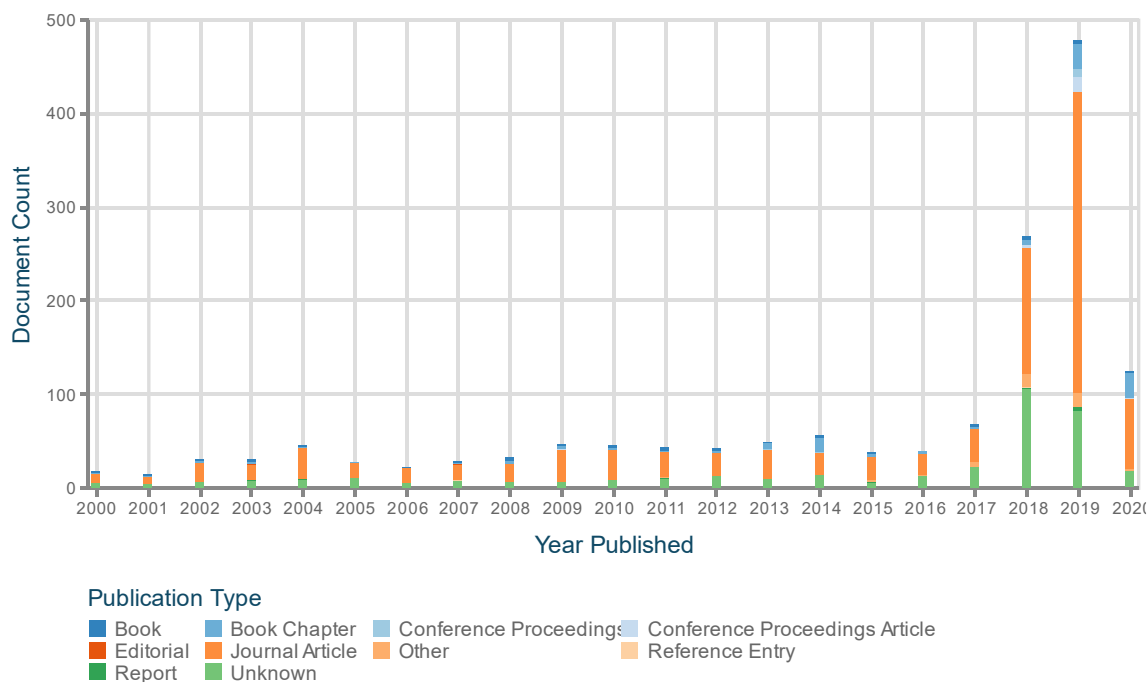

### Some figures to illustrate the hypothesis

**Fig. 1 query: energy security AND (assessment OR Indicators), (Works in Set — 2,998)**

**Fig. 2 query: sanctions, (Works in Set — 74,889)**

**Fig. 3 query: Trade Wars, (Works in Set — 1,563)**

Sanctions topic (a lot of publications) could begin to reduce attention to energy security assessment theme (not so much publications) in 2016. The topic “Trade Wars” rise in 2018 could reduce attention to energy security assessment theme. Some lag in one year could be explain by lag in publishing prosses.

For example, the lag in funding is till 2019, fig 4.

**Fig. 4 query: Trade Wars, (Works in Set — 1,563) — documents by funding**

Once again, it’s just the hypothesis, more research needs to do.

Another figures and data are uploaded on Figshare. The lists of files are below.

## **File name explanation:**

**data** at the end file name stand for csv table this data

Lens → The Lens - Free & Open Patent and Scholarly Search

E-security\_Ass → abbreviation of query: energy security AND (assessment OR Indicators), (Works in Set — 2,998)

2000-2020 → Filters: Year published = (2000 - 2020)

Field of Study → Microsoft Academic determines Field of study based on machine learning parsing of all accessible text in a record

Document Count → usually means the number of Scholarly Works published.

Institution Country → Only institutions with a matched GRID record have country data available.

--

**E-security\_Ass → abbreviation of query: energy security AND (assessment OR Indicators), (Works in Set — 2,998)**

Subject → Subject is derived from ISSN descriptions in Crossref metadata
