#### Cats and Plants

Why do cats eat grass or other types of plants? This survey, conducted by the UC Davis School of Veterinary Medicine, is the first to scientifically investigate this question. Your participation in this study is VERY important. Please answer as completely and as honestly as possible. ONLY TAKE THE SURVEY ONCE, otherwise our results will not be accurate. This survey should take approximately 15-20 minutes. When the study is completed, the results will be published and made available to the public. Thank you again for your participation!

### 1. Household Information

Please read the questions and follow the instructions CAREFULLY, otherwise we will be unable to use your answers.

- 1.1. NUMBER OF CATS: Total number of cats in your household:
- 1.2. CATS THAT EAT/CHEW PLANTS: To your knowledge, how many of your CATS have eaten or chewed plants at least once?

### 2. Cat Information

\*\*NOTE\*\* For the remainder of the survey, please answer the following questions for the ONE CAT in your household that eats or chews plants MOST frequently. If you have only one cat in your household, answer the following questions for that cat. If your cat DOES NOT chew or eat plants, please press the "Submit" button above; you do not need to complete the survey.

- 2.1. BREED QUESTION: What breed is your cat (choose one)?
  - Domestic Short-haired (DSH) MIXED BREED cat with short-hair
  - Domestic Medium-haired (DMH) MIXED BREED cat with medium length
  - hair
  - Domestic Long-haired (DLH) MIXED BREED cat with long-hair
  - Abyssinian
  - American Bobtail
  - American Curl
  - American Shorthair
  - American Wirehair
  - Balinese
  - Birman
  - Bombay
  - British Shorthair
  - Burmese
  - Chartreux
  - Colorpoint Shorthair
  - Cornish Rex

- Devon Rex
- Egyptian Mau
- European Burmese
- Exotic
- Havana Brown
- Himalayan
- Japanese Bobtail
- Iavanese
- Korat
- LaPerm
- Maine Coon
- Manx
- Norwegian Forest Cat
- Ocicat
- Oriental
- Persian
- Ragamuffin
- Ragdoll
- Russian Blue
- Scottish Fold
- Selkirk Rex
- Siamese
- Siberian
- Singapura
- Somali
- Sphynx
- Tonkinese
- Turkish Angora
- Turkish Van
- I do not know
- Other, Please Specify:
- 2.2. GENDER QUESTION: What is the sex of your cat?
- 2.3. AGE QUESTION: How old is your cat (approximate age)?
- 2.4. DURATION IN HOUSEHOLD: How long has this cat been in your household?
- 2.5. HOUSING QUESTION: Is your cat (choose one):
  - Indoor only (Not purposely let outside)
  - Primarily indoor/Supervised outdoor (Spends some supervised time outdoors)
  - Primarily indoor/Unsupervised outdoor (Spends some unsupervised time outdoors)
  - Indoor/Outdoor (Spends about equal amounts of time indoors and unsupervised outdoors)
  - Primarily outdoor (Usually outdoors but allowed to come inside)

- Outdoor only (Outdoor except for rare circumstances, for example, when sick)
- Other, Please Specify:
- 2.6. REASON FOR ACQUISITION: Is your cat primarily a (choose one):
  - Family member/Companion
  - Show/Competition Cat
  - Breeder Breeding for show/competition
  - Breeder Breeding for companion/pet
  - Barn Cat Pest control/Hunter
  - Neighborhood cat/Stray
  - Other, Please Specify:
- 2.7. CARETAKER QUESTION: Are you the primary caretaker of this cat?
  - Yes
  - No
- 2.8. TIME SPENT WITH YOUR CAT: On average, how many hours per day do YOU spend with your cat (able to observe his/her behavior)?
- 3. Plant Eating Behavior
- \*\*NOTE\*\* Please continue to answer the following questions for the ONE cat in your household that eats or chews plants MOST frequently (same cat as in section 2). If you have only one cat in your household, answer the following questions for that cat.
- 3.1. PLANT EATING/CHEWING QUESTION: Do you think your cat eats or chews plants?
  - Yes
  - No
- 3.2. DIRECT OBSERVATION OF PLANT EATING/CHEWING: Have you SEEN your cat eating or chewing plants at least once?
  - Yes
  - No
- 3.3. OTHER EVIDENCE OF PLANT EATING/CHEWING: Other than witnessing your cat, do you have other evidence that he/she eats or chews plants?
  - Yes
  - No
- 3.4. TYPES OF EVIDENCE: If you answered "Yes" to question 3.3 above, what type(s) of evidence do you have? (Choose all that apply) If you answered "No", please check "Not applicable".
  - Found plant material in his/her feces
  - Found plant material in his/her vomit
  - Found plant material in his/her mouth or teeth
  - Other people have told me
  - Found chewed plant material in your home or yard

- Had medical problems from eating/chewing plants (For example blocked intestine, poisoning, etc.)
- Other, Please Specify:
- Not applicable
- 3.5. TOTAL NUMBER OF TIMES PLANT EATING/CHEWING HAS BEEN OBSERVED: Approximately how many times have you SEEN your cat eat or chew plants throughout his/her life?
- 3.6. AGE OF YOUR CAT WHEN PLANT EATING/CHEWING STARTED: At what age did you first notice your cat eating or chewing plants?
- 3.7. FREQUENCY OF PLANT EATING/CHEWING: About how frequently does your cat eat or chew plants?
- 3.8. EATING VS. CHEWING PLANTS: Under MOST circumstances, does your cat (choose one):
  - Chew and swallow plant material (eats it) at least sometimes
  - Chew but doesn't seem to swallow plant material (chews it only)
  - Lick but doesn't chew plant material
  - Eat or chew plant material while eating other objects (For example treats, dirt, material, etc.)
  - Eat or chew plant material incidentally while playing (For example while playing with objects in the yard)
  - Eat or chew plant material incidentally while grooming
  - I do not know
  - Other, Please Specify:
- 3.9. ACCESS TO PLANTS: Where does your cat have ACCESS to plants? (Choose all that apply)
  - Inside your home (For example houseplants, floral arrangements, etc.)
  - Inside your home plants accidentally tracked inside (For example leaves, grass, etc.)
  - Inside your home groceries (vegetables, fruits or other plants)
  - On your deck or patio
  - In your yard supervised (you are outside watching your cat)
  - In your yard unsupervised
  - Outdoors/Neighborhood supervised (For example on leashed walks or outings)
  - Outdoors/Neighborhood unsupervised
  - Intentionally offered to him/her as a dietary supplement
  - Intentionally offered to him/her as a toy for enrichment
  - Other, Please Specify:
- 3.10. LOCATION(S) WHERE PLANT EATING/CHEWING HAS BEEN OBSERVED: Where have you SEEN your cat eat or chew plants? (Choose all that apply)
  - Inside your home (For example houseplants, floral arrangements, etc.)

- Inside your home plants accidentally tracked inside (For example leaves, grass, etc.)
- Inside your home groceries (vegetables, fruits or other plants)
- On your deck or patio
- In your yard supervised (you are outside watching your cat)
- In your yard unsupervised (spying; cat unaware that you are watching)
- Outside/Neighborhood supervised (For example on leashed walks or outings)
- Outside/Neighborhood unsupervised
- Intentionally offered to him/her as a dietary supplement
- Intentionally offered to him/her as a toy for enrichment
- Other, Please Specify:

# 3.11. TYPES OF PLANTS YOU HAVE OBSERVED YOUR CAT EATING/CHEWING: What types of plants have you SEEN your cat eat or chew? (Choose all that apply)

- Grass long blades (For example weeds)
- Grass short blades (For example lawn grass)
- Grass clippings
- Grass sold commercially (Cat Grass Plus, OzzyAtt Cat Grass Kit, etc.)
- Catnip Fresh
- Catnip Dried
- Green leaves
- Brown/dried leaves
- Flowers or petals
- Berries, fruit or vegetables
- Green plant stems
- Brown/dried plant stems
- Sticks, twigs or bark
- Roots
- Other, Please Specify:
- Not Applicable

# 3.12. TYPES OF PLANTS YOU SUSPECT YOUR CAT OF EATING/CHEWING: Excluding those plants that you have witnessed your cat eating or chewing, what OTHER types of plants do you SUSPECT your cat eats or chews based on indirect evidence (for example, seeing plant material in his/her feces, finding chewed plants, etc.)? (Choose all that apply)

- Grass long blades (For example weeds)
- Grass short blades (For example lawn grass)
- Grass clippings
- Grass sold commercially (For example Cat Grass Plus, OzzyAtt Cat
- Grass Kit. etc.)
- Catnip fresh
- Catnip dried
- Green leaves
- Brown/dried leaves
- Flowers or petals
- Berries, fruit or vegetables

- Green plant stems
- Brown/dried plant stems
- Sticks, twigs or bark
- Roots
- Other, Please Specify:
- Not Applicable
- 3.13. TYPES OF PLANTS MOST FREQUENTLY EATEN/CHEWED: Based on either direct observation or other evidence, what type of plant does your cat MOST FREQUENTLY eat or chew? (Choose ONE answer)
  - Grass long blades (For example weeds)
  - Grass short blades (For example lawn grass)
  - Grass clippings
  - Grass sold commercially (For example Cat Grass Plus, OzzyAtt Cat
  - Grass Kit, etc.)
  - Catnip fresh
  - Catnip dried
  - Green leaves
  - Brown/dried leaves
  - Flowers or petals
  - Berries, fruit or vegetables
  - Green plant stems
  - Brown/dried plant stems
  - Sticks, twigs or bark
  - Roots
  - Other, Please Specify:
  - Not Applicable
- 3.14. NAME OF PLANT EATEN OR CHEWED MOST FREQUENTLY: If you know the SPECIFIC type and part of the plant your cat most frequently eats or chews, please write it below. (For example Oat grass, commercially produced, eats tips only; Chinese peas eats pea pods only.).

If you do not know the specific type of plant, please check "I do not know".

- I do not know
- 3.15. BEHAVIOR(S) INVOLVED IN EATING/CHEWING PLANTS: Does your cat exhibit any particular patterns to his/her plant eating/chewing behavior? (Choose all that apply)
  - I have not observed him/her I do not know
  - No particular pattern observed
  - Eats/chews plants when apparently feeling "ill" (For example inactive, not eating, hiding, etc.)
  - Eats/chews plants in specific locations (For example friend's home, specific corner of yard, etc.)
  - Eats/chew splants if other pets are also eating plants
  - Would eat/chew plants all the time if I let him/her

- Eats/chews plants following specific events (For example after being brushed, after coming home from the vet, etc.)
- Eats/chews plants at certain times of the day (For example morning, evening, etc.)
- Eats/chews plants at certain times of the year (For example spring, fall, etc.)
- Eats/chews plants when "bored"
- Eats/chews plants after certain weather conditions (For example after it has rained)
- Eats/chews plants that other animals have urinated on
- Other, Please Specify:
- None of the above

3.16. CAT'S BEHAVIOR BEFORE EATING/CHEWING PLANTS: With respect to the type of plant your cat MOST COMMONLY eats or chews (Question 3.13) - Select the behavior your cat MOST COMMONLY engages in during the hour BEFORE your cat eats THIS SPECIFIC TYPE OF PLANT. (Choose one)

- Unable to observe I do not know
- Goes about his/her normal life; acts normally which may include sleeping, eating, drinking, grooming, etc.
- Vomits AND shows signs of feeling "ill" (For example depression, loss of appetite, inactivity, etc.)
- Does NOT vomit, but shows signs of feeling "ill" (For example depression, loss of appetite, inactivity, etc.)
- Vomits, but does NOT appear "ill"
- Other, Please Specify:

3.17. CAT'S BEHAVIOR AFTER EATING/CHEWING PLANTS: With respect to the type of plant your cat MOST COMMONLY eats or chews (Question 3.13) - Select the behavior your cat MOST COMMONLY engages in during the hour AFTER your cat eats THIS SPECIFIC TYPE OF PLANT. (Choose one)

- Unable to observe I do not know
- Goes about his/her normal life; acts normally which may include sleeping, eating, drinking, grooming, etc.
- Vomits AND shows signs of feeling "ill" (For example depression, loss of appetite, inactivity, etc.)
- Does NOT vomit, but shows signs of feeling "ill" (For example depression, loss of appetite, inactivity, etc.)
- Vomits, but does NOT appear "ill"
- Other, Please Specify:

3.18. FREQUENCY OF VOMITING BEFORE EATING/CHEWING PLANTS: How frequently does your cat vomit BEFORE eating or chewing plants? (Choose one answer)

- Never vomits before eating or chewing plants (0% of the time)
- Rarely vomits before eating or chewing plants (Less than 10% of the time)
- Occasionally vomits before eating or chewing plants (10-25% of the time)
- Sometimes vomits before eating or chewing plants (205-50% of the time)
- Often vomits before eating or chewing plants (50-75% of the time)

- Frequently vomits before eating or chewing plants (75-90% of the time)
- Typically vomits before eating or chewing plants (Greater than 90% of the time)
- Always vomits before eating or chewing plants (100% of the time)
- 3.19. FREQUENCY OF VOMITING AFTER EATING/CHEWING PLANTS: How frequently does your cat vomit AFTER eating or chewing plants? (Choose one answer)
  - Never vomits after eating or chewing plants (0% of the time)
  - Rarely vomits after eating or chewing plants (Less than 10% of the time)
  - Occasionally vomits after eating or chewing plants (10-25% of the time)
  - Sometimes vomits after eating or chewing plants (25-50% of the time)
  - Often vomits after eating or chewing plants (50-75% of the time)
  - Frequently vomits after eating or chewing plants (75-90% of the time)
  - Typically vomits after eating or chewing plants (Greater than 90% of the time)
  - Always vomits after eating or chewing plants (100% of the time)
- 3.20. TIME INTERVAL BETWEEN VOMITING AND EATING/CHEWING PLANTS: If your cat vomits BEFORE eating or chewing plants On average, how many hours after vomiting does your cat eat or chew plants?
  - Not Applicable
- 3.21. TIME INTERVAL BETWEEN EATING/CHEWING PLANTS AND VOMITING: If your cat vomits AFTER eating or chewing plants On average, how many hours after eating or chewing plants does your cat vomit?
  - Not Applicable
- 3.22. ASSOCIATION BETWEEN VOMITING AND EATING/CHEWING CERTAIN TYPES OF PLANTS: Does your cat regularly vomit after eating certain types of plants? (Choose all that apply)
  - Grass (long blades, short blades, clippings, commercially grown)
  - Catnip (fresh or dried)
  - Leaves (green or dried)
  - Flowers or petals
  - Berries, fruits or vegetables
  - Plant stems (green or dried)
  - Sticks, twigs or bark
  - Roots
  - Other, Please Specify:
  - Not Applicable
- 3.23. PLANTS IN FECES: Have you ever seen grass or other plant material in your cat's FRESH feces/droppings?
  - Yes
  - No
- 4. Diet

- 4.1. DIET QUESTION: Select all types of food your feed your cat more than once per week. (Choose all that apply)
  - Moist food/canned or foil packaged
  - Dry food/kibble
  - Semi-moist food (For example Purina Happy Cat moist, etc.)
  - Home-cooked diet
  - Raw food diet (For example chicken back/necks, frozen commercial raw food diet, etc.)
  - Commercial treats Dry (For example Pounce Hairball Crunchy Treat, etc.)
  - Commercial treats Semi-moist (For example Pounce moist treats, Friskies cat treats, etc.)
  - Commercial treats Dried shrimp or fish flakes
  - Treats "People food"/Left-overs

# 4.2. PRIMARY DIET QUESTION: Your cat's diet consists primarily (>50%) of (Choose one answer):

- Moist food/canned or foil packaged
- Dry food/kibble
- Semi-moist food (For example Purina Happy Cat moist, etc.)
- Home-cooked diet
- Raw food diet (For example chicken back/necks, frozen commercial raw food diet, etc.)
- Commercial treats Dry (For example Pounce Hairball Crunchy Treat, etc.)
- Commercial treats Semi-moist (For example Pounce moist treats, Friskies cat treats, etc.)
- Commercial treats Dried shrimp or fish flakes
- Treats "People food"/Left-overs
- Other, Please Specify:

## 4.3. TYPE OF FOOD: This food is (choose one):

- Commercial Premium Label (For example Eukanuba, Science Diet, Purina, Alpo, etc.)
- Commercial Private Label (For example Costco brand, Safeway brand, Old Mother Hubbard, etc.)
- Prescription Only available through your veterinarian (For example Hill's w/d, IVD duck and potato, Purina HA, etc.)
- Home-cooked Veterinarian recommended (For example home-cooked diet for food allergies or intestinal disease, etc.)
- Home-cooked diet Not specifically recommended by a veterinarian
- Raw food diet Commercial (For example Steve's Real Food, Primal
- Pet Food, Animal Food Services Pet Patties, Sojourner Farms, etc.)
- Raw food diet Home prepared (For example chicken necks/backs, etc.)
- Other, Please Specify:

## 4.4. DURATION OF CURRENT DIET: How long has your cat been on this same diet?

- 4.5. DIET MODIFICATION: Did you change your cat's diet after noticing that he/she ate or chewed plants? (Choose all that apply)
  - I did NOT change my cat's diet after noticing he/she ate or chewed plants
  - Changed type or brand of food Specifically to increase fiber
  - Changed type or brand of food For other reasons (For example to try a prescription diet, to try something more tasty, etc.)
  - Added vitamin or mineral supplement to diet (For example Barley Cat, vitamin C, MSM, etc.)
  - Added vegetables or other plant material to diet (For example started feeding vegetables, commercial grass, etc.)
  - Other, Please Specify:
- 4.6. AFFECT OF DIET MODIFICATION ON PLANT EATING/CHEWING: If you changed your cat's diet or added supplements, did it affect the frequency of plant eating or chewing? If you did not change your cat's diet, please mark "Not Applicable". (Choose one answer)
  - No change
  - Increased the frequency of plant eating/chewing
  - Decreased the frequency of plant eating/chewing
  - Other, Please Specify:
  - Not Applicable

## 5. Medical History

- 5.1. CURRENT MEDICAL HISTORY: Does your cat CURRENTLY have any of the following diseases? (Choose all that apply)
  - Not currently ill Does not currently have any disease
  - Stomach or Intestine/GI (For example vomiting, diarrhea, IBD, intestinal worms, etc.)
  - Skin/Dermatologic (For example allergies, fleas, hair loss, etc.)
  - Urinary (For example renal failure, urinary tract infection, cystitis, bladder or kidney stones, etc.)
  - Heart/Cardiac (For example heart failure, thickened heart, HCM, abnormal heart beats or rhythm, etc.)
  - Lungs/Respiratory (For example asthma, etc.)
  - Endocrine (For example hyperthyroid, diabetes, etc.)
  - Eyes/Ophthalmologic (For example ulcers, runny eyes, etc.,)
  - Musculoskeletal (For example arthritis, fractures, etc.)
  - Neurologic (For example seizures, back or neck pain or trauma, etc.)
  - Cancer
  - Other, Please Specify:
- 5.2. WORMS IN FECES: Have you or your veterinarian ever seen worms (tapeworms, roundworms, hookworms, whipworms, etc.) or worm eggs in your cat's feces/droppings?
  - Yes
  - No

I do not know

5.3. PARASITE CONTROL: Does your cat regularly receive any of the following medications? (Choose all that apply)

- Not receiving any medications regularly
- I do not know
- Flea/tick control Topical (on the skin) (For example Frontline, Advantage, etc.)
- Flea/tick control Pills (For example Program, Capstar, etc.)
- Flea/tick control Injectable (For example Program injectable, etc.)
- Flea/tick control Collar (For example Preventic, Hartz, etc.)
- Flea/intestinal worms/heartworm/mites Topical (on the skin) (For example Revolution, etc.)
- Heartworm Only Pill or Chew (For example Heartgard, etc.)
- Heartworm/Intestinal Parasites Pill (For example Interceptor)
- Herbal or other supplements to treat fleas/ticks (For example garlic, etc.)
- Herbal or other supplements to treat intestinal parasites or worms (For example mineral oil, etc.)
- Other, Please Specify:

5.4. CURRENT MEDICATIONS: Is your cat CURRENTLY receiving or has received in the past MONTH any of the following medications? (Choose all that apply)

- Not currently receiving any medications; has not received any medications in the past month
- I do not know
- Deworming medication (For example Drontal, Droncit, Panacur,
- D-worm, Strongid, etc.)
- Steroids (For example prednisone or prednisolone)
- Anti-seizure medication (For example phenobarbitol or potassium bromide)
- Appetite stimulants (For example cyproheptidine)
- Thyroid medication (For example Tapazol or other medication for hyperthyroidism)
- Pain medication (For example aspirin, Rimadyl, Metacam. etc.)
- Behavior drugs (For example Elavil/amitriptyline, Prozac/fluoxetine, Buspar, Valium, Xanax, etc.)
- Antacids (For example Pepcid, Zantac, Prilosec, Tagamet, etc.)
- Eye medication with steroids (For example Trioptic, Vetropolcin, Neo-Predf, BNP with hydrocortisone, etc.)
- Ear medication with steroids (For example Synotic, Tresaderm, Panalog, Gentocin Otic, etc.)
- Antibiotics (For example Clavamox, Amoxi-drops, Baytril, cephalexin, etc.)
- Sedatives or tranquilizers (For example acepromazine, etc.)
- Other, Please Specify:
- Not currently receiving any medications
