# Abstract

**Abstract:** A curriculum vitae (CV) allows you to showcase yourself and your academic and professional achievements in a concise and effective way. Creating an online CV presenting who you are to your academic and professional peers. Creating and maintaining your online CV is an essential tool in disseminating your research and publications. A scholarly identifiers like your **ResearcherID**, is one of the online CV and provides a solution to the author ambiguity problem within the scholarly research community.

**Keywords:** H-index, Improve citations, Research tools, Bibliometrics, Research Visibility, ResearcherID

# Research Tools Mind Map

# Research Tools Mind Map -> (4) Enhancing visibility and impact -> On-line Curriculum vitae -> ResearcherID

**ResearcherID** gives author disambiguation a good name, enhancing discoverability and ensuring credit where credit is due

Source: <http://stateofinnovation.thomsonreuters.com/author-disambiguation-whats-in-a-name>

# Benefits of e-visibility

- It is a powerful way for researchers to boost their professional profile – online resume / cv (Bik & Goldstein: 2013)
- Take control of their research (Goodier & Czerniewicz: 2012)
- It helps researcher gain recognition in their discipline (Goodier & Czerniewicz: 2012)
- It helps to improve research efficiency – disseminating their research and making it discoverable and accessible (Bik & Goldstein: 2013)
- It allows for citation tracking and improving your impact as a researcher (Traditional and alternative) – citation counts, citation analysis and accumulation of attention data which translates to altmetrics
- It enhances professional networking of researchers – can make contact with other researchers and collaborate – grow your networks (Goodier & Czerniewicz: 2012)
- It allows for wider communication between scientists and general public – “online outreach” if you may (Bik & Goldstein: 2013)

Source: Leslie Adriaanse (2015), "[Increasing e-visibility](#)", Personal Librarian: CAES, Science Campus, University of South Africa

# Research e-profiles

Essential elements necessary in a research e-profile (Ward, Bejarano & Dudas: 2015):

1. Electronic representation of the researcher online
2. Researcher/research online reputation
3. Researcher/research online discoverability and accessibility

# Why should I care about my online presence?

- To make your research and teaching activities known
- To increase the chance of publications getting cited
- To correct attribution, names and affiliations
- To make sure that as much as possible is counted in research assessments
- To increase the chance of new contacts for research cooperation
- To increase the chance of funding
- To serve society better

# Author Identification Systems

Author name disambiguation and the association of scholarly works with the correct author have long been a problem for those wishing to develop a comprehensive list of publications for individuals.

[Source: A. B. Wagner, "Author Identification Systems," \*Issues in Science and Technology Librarianship\*, 2009.](#)

# The Challenge at Hand

- Inconsistent name formats caused by the authors themselves or editors
- Various transliteration systems, especially where different non-Roman alphabet names result in the same transliterated Roman alphabet name.
- Legal name changes
- Cultural variants in the position of surnames
- Compound or hyphenated names
- Highly similar names sometimes even doing similar work at the same institution.
- The large number of common names, especially certain surnames in many cultures.

[Source: A. B. Wagner, "Author Identification Systems," \*Issues in Science and Technology Librarianship\*, 2009.](#)

# Researcher/research online discoverability and accessibility

- Build an online an accurate list of research publications by uploading/importing the research publication information from various platforms/systems
- Automatically track times cited counts & citation metrics, calculates H-Index
- Citation counts, metrics & H-index are current and publically visible
- Visualization tools e.g. collaboration networks

# Why online CV.?

Increased access to publications leads to higher visibility and thus increased impact.

Source: [Morag Greig, Enlighten: Glasgow's University's online institutional repository](#)

# Maximize Usage through Dissemination

- **Add a link to your article on your signature file and link to the Abstract.**

- **Add links to your articles on your own website, your institution's site or repository, bulletin boards and discussion lists.**

Source: Jaslyn Tan, (2014), Maximizing the impact of your research paper, WILEY

# Including hyperlinks in your CV can make a big difference.

The digital scholar and the academic job market: Including hyperlinks in your CV can make a big difference.

How can academics ensure their job application stands out from the rest? **Patrick Dunleavy** advocates going fully digital, where clearly clickable and open-access hyperlinks are provided for all your publications, writings and alternative outputs. Alongside the ease this provides the selection committee, adding digital links to all your recent top research articles will reassure UK selectors that your research falls under the HEFCE open access mandates for the next REF.

The rules governing academic CVs and résumés are complex. And they are generally different from those applying to all other spheres of the job market. In particular academic CVs often look as if they are lagging decades behind those in other sectors of life. Researchers still mostly operate with documents designed for paper printing only, set out in conservative ways and devoid of any digital

# What is ORCID ?

## The ORCID Organization

- Non-profit, non-proprietary, open, and community-driven
- Global, interdisciplinary
- Supported by the membership of organizations using the ORCID API
  - Funding organizations
  - Professional societies
  - Universities & research institutes
  - Publishers

## The ORCID iD

- Unique, persistent identifier for researchers & scholars
- Free to researchers
- Can be used throughout one's career, across professional activities, disciplines, nations & languages
- Embedded into workflows & metadata
- API enables interoperability between siloed systems

# EBSCO Information Services joins ORCID

The logo for EBSCO, featuring the word "EBSCO" in white, bold, sans-serif capital letters on a dark blue rectangular background.

INFORMATION SERVICES

**IPSWICH, Mass. — October 22, 2013 —** [EBSCO Information Services](#) (EBSCO) announces it is now a member of [Open Researcher and Contributor ID](#) (ORCID), an open, non-profit, community-driven effort to create and maintain a registry of unique and persistent researcher identifiers. ORCID works with the community to embed these identifiers in research workflows and systems to connect researchers with their scholarly activities and contributions.

Source: <http://www.ebscohost.com/newsroom/stories/ebsco-information-services-joins-orcid>

# Why get an ORCID identifier?

## Benefits of getting an ORCID iD include:

- Ensuring researchers get credit for their work
- Reducing time to identify scholarly output (see “Publisher integration,” below)
- Enabling scholars to keep track of and report on their work with funders, publishers and institutions
- Repurposing data for use in CV generation, citation repositories, BU Profiles, annual reports, faculty web-sites, and other systems (see “Grant submission integration,” below)
- Tying individuals to their scholarly work should make finding academic papers easier and more accurate

Publisher integration: Elsevier, Thomson Reuters, Nature and other major publishers have begun integrating ORCID iDs into the manuscript submission process, and embedding ORCID identifiers across their scientific and scholarly research ecosystem. This will save authors time during submission, and enable automatic updating of author bibliographies when articles are published. That information can be ingested into BU systems, at each scholar’s discretion.

Grant submission integration: NIH, NSF and other federal agencies are planning to integrate ORCID iDs into the ScienCV platform, for linking researchers, their grants, and their scientific output. The US federal government has been working to create a fed-wide profile system to streamline the grants and contract application process and reduce the data entry burden for investigators, and ORCID holds promise to be part of the solution.

# Why use ORCID

A more illustrative example: **Jens Åge Smærup Sørensen**

ResearcherID is a unique digital alpha-numeric identifier containing the year of creation.

The screenshot shows the 'Managing Author Profiles Online' page on the LibGuides website. The page features a navigation bar with tabs for Home, ORCID, ResearcherID (selected), Scopus Author ID, and Google Scholar Citations. The main content area is titled 'ResearcherID' and includes a search bar, a 'Comments(0)' link, and a 'Print Page' icon. The page is divided into three columns: a left sidebar with a 'RESEARCHERID' heading and a description; a central 'Create a ResearcherID profile' section with a numbered list of steps and links; and a right 'Feedback' section with a survey and a comment box.

**ResearcherID** Comments(0) Print Page **Search:**  This Guide

### ResearcherID

**RESEARCHERID**

- ✓ ResearcherID is a unique digital alpha-numeric identifier containing the year of creation. With a ResearcherID, users can update their profile information, build their publication list using Web of Science, EndNote Web or by uploading an RIS file, and choose to make their profile public or private.
- ✓ ResearcherID is fully integrated with the Thomson Reuters' Web of Science.

### Create a ResearcherID profile

1. Register for a [ResearcherID](#). A link will be emailed to you for confirmation and to complete the registration process.
2. Add variants of your name (e.g., Mueller J.; Muller J; Mueller, JR; Jörg Müller; Joerg Mueller; Jorg Muller).
3. Use **National Institute of Education, Nanyang Technological University** as the primary institution name.
4. Agree to exchange data with ORCID.
  - [Register for ResearcherID](#)
  - [View the video on how to create your ResearcherID profile](#)

[Comments \(0\)](#)

### Feedback

Was this information helpful?

Yes  No  Don't Know

How useful is this page?  
(1 = Not Useful, 5 = Very Useful!)

1  2  3  4  5

Additional comments:

# Communication in science: Research Branding, Networking & Collaboration

# Promote your research with **ResearchID**

- Keep your own publication organized: any records from any resources in any language
- Access citation metrics for your publications as well as for other researchers
- Connect to experts and collaborators in your field
- Easily access to your publications in Web of Science by searching your distinct identifier
- Free access anywhere

THOMSON REUTERS™

ResearcherID is a tool to fight the problem of ambiguity within the scientific community by supplying each scholar with a unique identifier.

## ResearcherID – Identify your publications

ResearcherID is a tool to fight the problem of ambiguity within the scientific community by supplying each scholar with a unique identifier and associating each researcher with his or her published work. ResearcherID helps to make sure that the publication and citation credits are directed to right scholars.

Publications can be added by either identifying them in Web of Knowledge, adding them using EndNote Web or uploading an RIS file (e.g. from RefWorks citation manager). Based on the publications, ResearcherID will calculate the scholar's H-index and provide various statistics and graphs that are based on for example citation count and co-authors.

When you send your ID number to the Library, we can identify Aalto publications more accurately for correct researchers and departments. By standardizing author names the information searches used for example in publication analysis are more accurate. With ResearcherID each scholar can maintain and share their publication list and citation information.

### 5 steps for creating your own ResearcherID:

1. Register at [www.researcherid.com](http://www.researcherid.com) and receive your personal ID.
2. Make sure your profile contains "Aalto University, Dept. of..." as an affiliation. You can also add your past affiliations in your profile.
3. Identify your papers in the Web of Knowledge databases and link them to your ResearcherID. You can also add publications using EndNote Web or by uploading RIS file. Please notice that ResearcherID can calculate the citation data only from the Web of Knowledge databases: the citation metrics will not be transferred from other databases and the H-index is based only on the data from Web of Knowledge.

THOMSON REUTERS

## WEB OF KNOWLEDGE USER TIPS - RESEARCH MADE EASY

Dear readers, this will be our last issue for the year 2010. From our team here, we want to wish you a Happy Holidays and a Happier New 2011!

Thanks and regards,  
Preeti Sinha

# Step 3: Upload an RIS file (from EndNote, RefMan or other reference software)

## Option 3:

 Upload RIS file.

**Upload an RIS file (from EndNote, RefMan or other reference software)**

You can upload an RIS formatted text file. The RIS file format is a tagged format for expressing bibliographic citations.

You can upload an RIS-formatted file, which can be exported from EndNote, RefMan, or other reference software. The RIS format is a tagged file format.

**Description:** Nader Ale Ebrahim holds a PhD degree in Technology Management from the Department of Engineering Design and Manufacture, Faculty of Engineering, University of Malaya. He holds a Master of Science in the Mechanical Engineering from the University of Tehran with distinguished honors. He also has over 19 years of experience in the establishment of the R&D departments in different companies, heading projects as the project director and project coordinator and implementing knowledge based system in the R&D department. His current research interest focuses on E-skills, Research Tools, Bibliometrics and managing virtual NPD teams in SMEs' R&D centers. His papers/articles have published and presented in the several journals and conferences.

### Does Criticisms Overcome the Praises of Journal Impact Factor? 04-2013

DOI: 10.5539/ass.v9n5p176 URL: [http://papers.ssrn.com/sol3/papers.cfm?abstract\\_id=2257552](http://papers.ssrn.com/sol3/papers.cfm?abstract_id=2257552)

Journal impact factor (IF) as a gauge of influence and impact of a particular journal comparing with other journals in the same area of research, reports the mean number of citations to the published articles in particular journal. Although, IF attracts more attention and being used more frequently than other measures, it has been subjected to criticisms, which overcome the advantages of IF. Critically, extensive use of IF may result in destroying editorial and researchers' behaviour, which could compromise the quality of scientific articles. Therefore, it is the time of the timeliness and importance of a new invent

**Abstract**  
 Physical activity and aging research has burgeoned in the past few decades. Despite the increase in scholarly publications no attempts have been made to summarize the publication landscape and to identify works that had great impact to physical activity and aging research. We conducted a bibliometric analysis and collected publication data from 1980 to February 6, 2015 in the Web of Science Core Collection. Of the overall 9,935 publications most were published after 2007 and almost 60% were in the category of Geriatrics and Gerontology or Sport Sciences. [Hinhiv cited](#)
