

Supplementary Figure 3: Funnel plots with nonparametric trim-and-fill analysis of publication bias for (a) immediate PES. (b) 3 months PES. (c) 6 months PES. (d) 12 months PES. (e) 3 months BPW (f) 6 months BPW. (g) 3 months BPH. (h) 6 months BPH. (i) 12 months BPH. (j) Immediate ISQ Events: BPH: buccal plate width, BPH: buccal plate height. PES: pink esthetic score. ISQ: implant stability quotient and the linear estimator was used to estimate the number of missing studies. REML: restricted maximum-likelihood.
