CONTENTS

Photographs of *Perijasaurus lapaz* nov. gen. et nov. sp. (UCMP 37689).

Specimen is a dorsal vertebra consisting of three parts: (1) partial neural arch; (2) right diapophysis; and (3) centrum and partial neural arch.

Photographs on pages 3–20:

1. partial neural arch, anterior
2. partial neural arch, dorsal
3. partial neural arch, left lateral
4. partial neural arch, posterior
5. partial neural arch, right lateral
6. partial neural arch, ventral

7. right diapophysis, anterior
8. right diapophysis, distal
9. right diapophysis, dorsal
10. right diapophysis, posterior
11. right diapophysis, proximal
12. right diapophysis, ventral

13. centrum/partial neural arch, anterior
14. centrum/partial neural arch, dorsal
15. centrum/partial neural arch, left lateral
16. centrum/partial neural arch, posterior
17. centrum/partial neural arch, right lateral
18. centrum/partial neural arch, ventral
