

SUPPLEMENTARY DATA 5

**Unriddling an old dolphin: platanistoid *Notocetus vanbenedeni* Moreno, 1892 from the  
early Miocene of Patagonia (Argentina)**

MARIANA VIGLINO<sup>1</sup>, MÓNICA R. BUONO<sup>1</sup>, YOSHIHIRO TANAKA<sup>2</sup>, JOSÉ I. CUITIÑO<sup>1</sup>  
and R. EWAN FORDYCE<sup>3</sup>

<sup>1</sup>Instituto Patagónico de Geología y Paleontología, CCT CONICET-CENPAT, Bvd. Brown  
2915, Puerto Madryn, Chubut, U9120ACD, Argentina.

<sup>2</sup>Osaka Museum of Natural History, Nagai Park 1-23, Higashi-Sumiyoshi-ku, Osaka, 546-0034,  
Japan.

<sup>3</sup>Department of Geology, University of Otago, Box 56, Dunedin, 9054, New Zealand.

**Supplementary Data 5.** Supplementary figures for the anatomical description of *Notocetus vanbenedeni*, as well as full cladograms. Note that for the analyses under implied weights, only MPTs of K= 6, 9, 14, 18, and 25 are shown, as their topology was different between themselves and with the strict consensus of the analysis under equal weights.

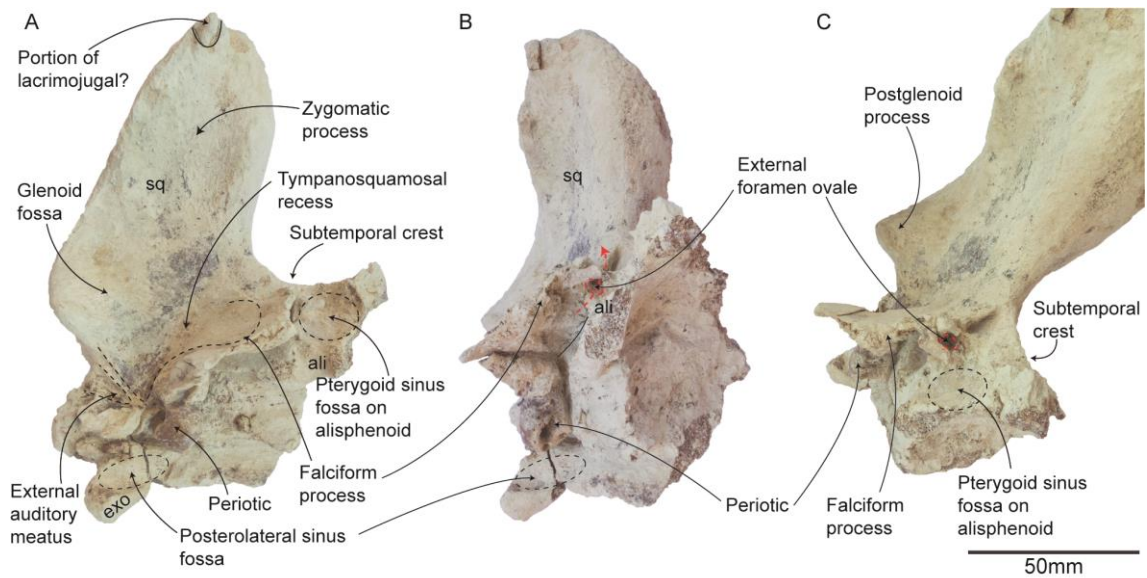

**FIGURE S1.** Lateral view of the skull of *Notocetus vanbenedeni*, MPEF-PV 2580 (top) and MLP 5-5 holotype (bottom).

**FIGURE S2.** Anterior (A, C, D) and dorsal (B) view of *Notocetus vanbenedeni*, showing the wedge posterior to the antorbital notch, between the maxilla at the orbital region and at the rostrum region. **A**, MLP 5-10 (holotype); **B**, MPEF-PV 1660; **C**, MPEF-PV 2580; **D**, MLP 5-10.

**FIGURE S3.** Ventral view of *Notocetus vanbenedeni*, showing the orientation of the alveolar groove **A**, MLP 5-10 (holotype); **B**, MLP 5-10; **C**, MPEF-PV 681; **D**, MPEF-PV 1804; **E**, MPEF-PV 2580.

**FIGURE S4.** Details of the squamosal area in *Notocetus vanbenedeni* with periotic *in situ* (MPEF-PV 2580). Red arrows indicate the position and inferred direction of the external foramen ovale, where the mandibular nerve emerged. Continuous lines indicate sutures, and dashed lines indicate important structures. **A**, ventral, **B**, posteromedial and **C**, anterior views. **Abbreviations:** **ali**, alisphenoid; **sq**, squamosal; **exo**, exoccipital.

**FIGURE S5.** Detail of the anterointernal sulcus in the anterior process of the right periotic of *Notocetus vanbenedeni* (MLP 76-IX-2-5). **A**, medial view without labels; **B**, medial view with labels.

**FIGURE S6.** Detail of tympanic sulcus in the left tympanic bulla of *Notocetus vanbenedeni* (MPEF-PV 1117). **A**, Posteromedial, **B**, posterior and **C**, medial views.

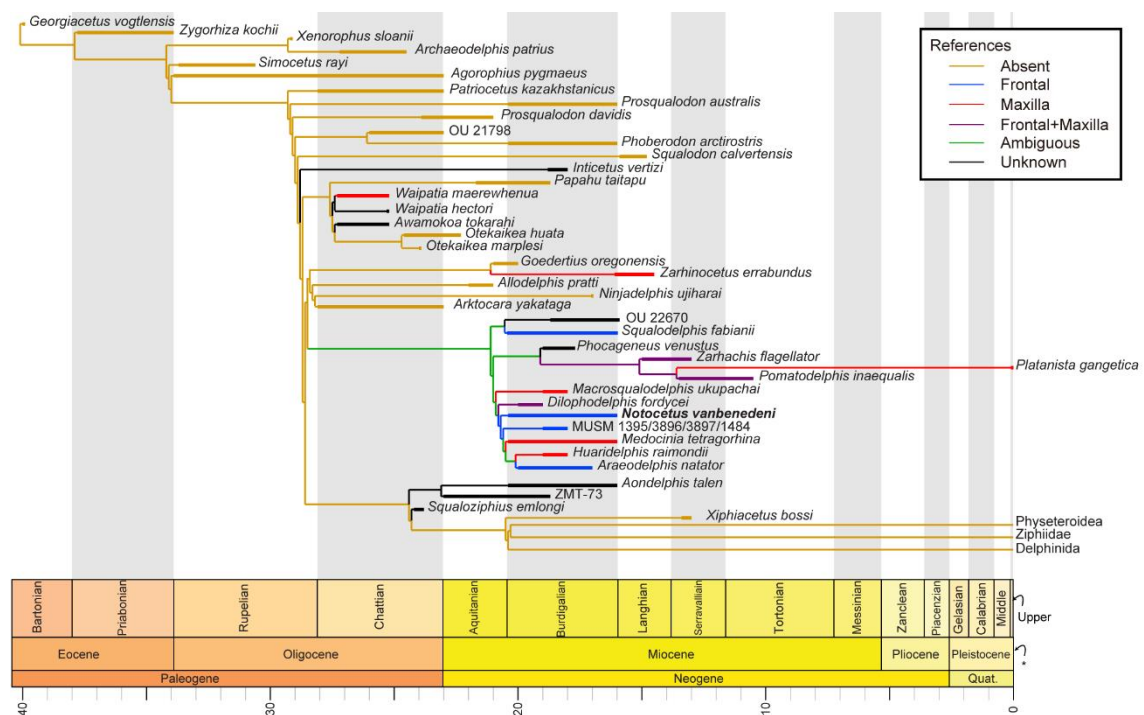

**FIGURE S7.** Detail of the anterodorsal crest and posterior process in the tympanic bulla of *Notocetus vanbenedeni* (AMNH 29026) in dorsal view **A**, without and **B** with labels.

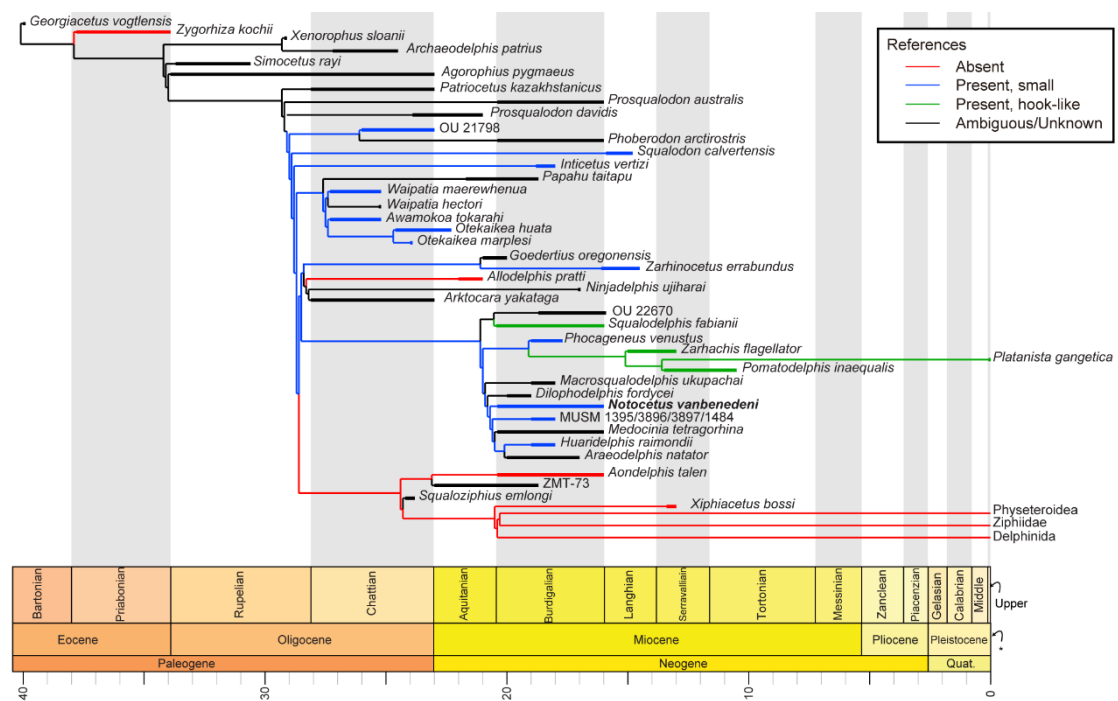

pterygoid; **supra**, supraoccipital; **sq**, squamosal; **v**, vomer. References: **A**: **1**, premaxillary foramen; **2**, anterior dorsal infraorbital foramen; **3**, posterior dorsal infraorbital foramen; **4**, groove posterior to antorbital notch; **5**, supraorbital crest; **6**, medial facial crest; **7**, premaxillary sac fossa; **8**, posterolateral sulcus; **9**, anteromedial sulcus. **B**: **1**, posterior dorsal infraorbital foramen; **2**, temporal fossa; **3**, neck muscle fossa. **C**: **1**, palatine foramina; **2**, ventral infraorbital foramina; **3**, ethmoid foramen; **4**, sphenopalatine foramen; **5**, optic foramen; **6**, foramen rotundum; **7**, orbital fissure; **8**, ventral carotid foramen; **9**, subcircular fossa; **10**, fossa for the articular rim; **11**, foramen spinosum; **12**, foramen ovale; **13**, external foramen ovale; **14**, cranial hiatus; **15**, jugular notch; **16**, periotic fossa; **17**, externa auditory meatus.

**FIGURE S9.** Optimization of character “Supraorbital crest, major bones that contributes to it” on the **time-calibrated** phylogenetic hypothesis obtained under implied weights with **K=26**. Asterisk indicates the Holocene epoch.

**FIGURE S10.** Optimization of character “Articular rim of the periotic” on the time-calibrated phylogenetic hypothesis obtained under implied weights with K=26. Asterisk indicates the Holocene epoch.

**FIGURE S11.** Full strict consensus of 8 MPTs of the phylogenetic analysis under equal weights.

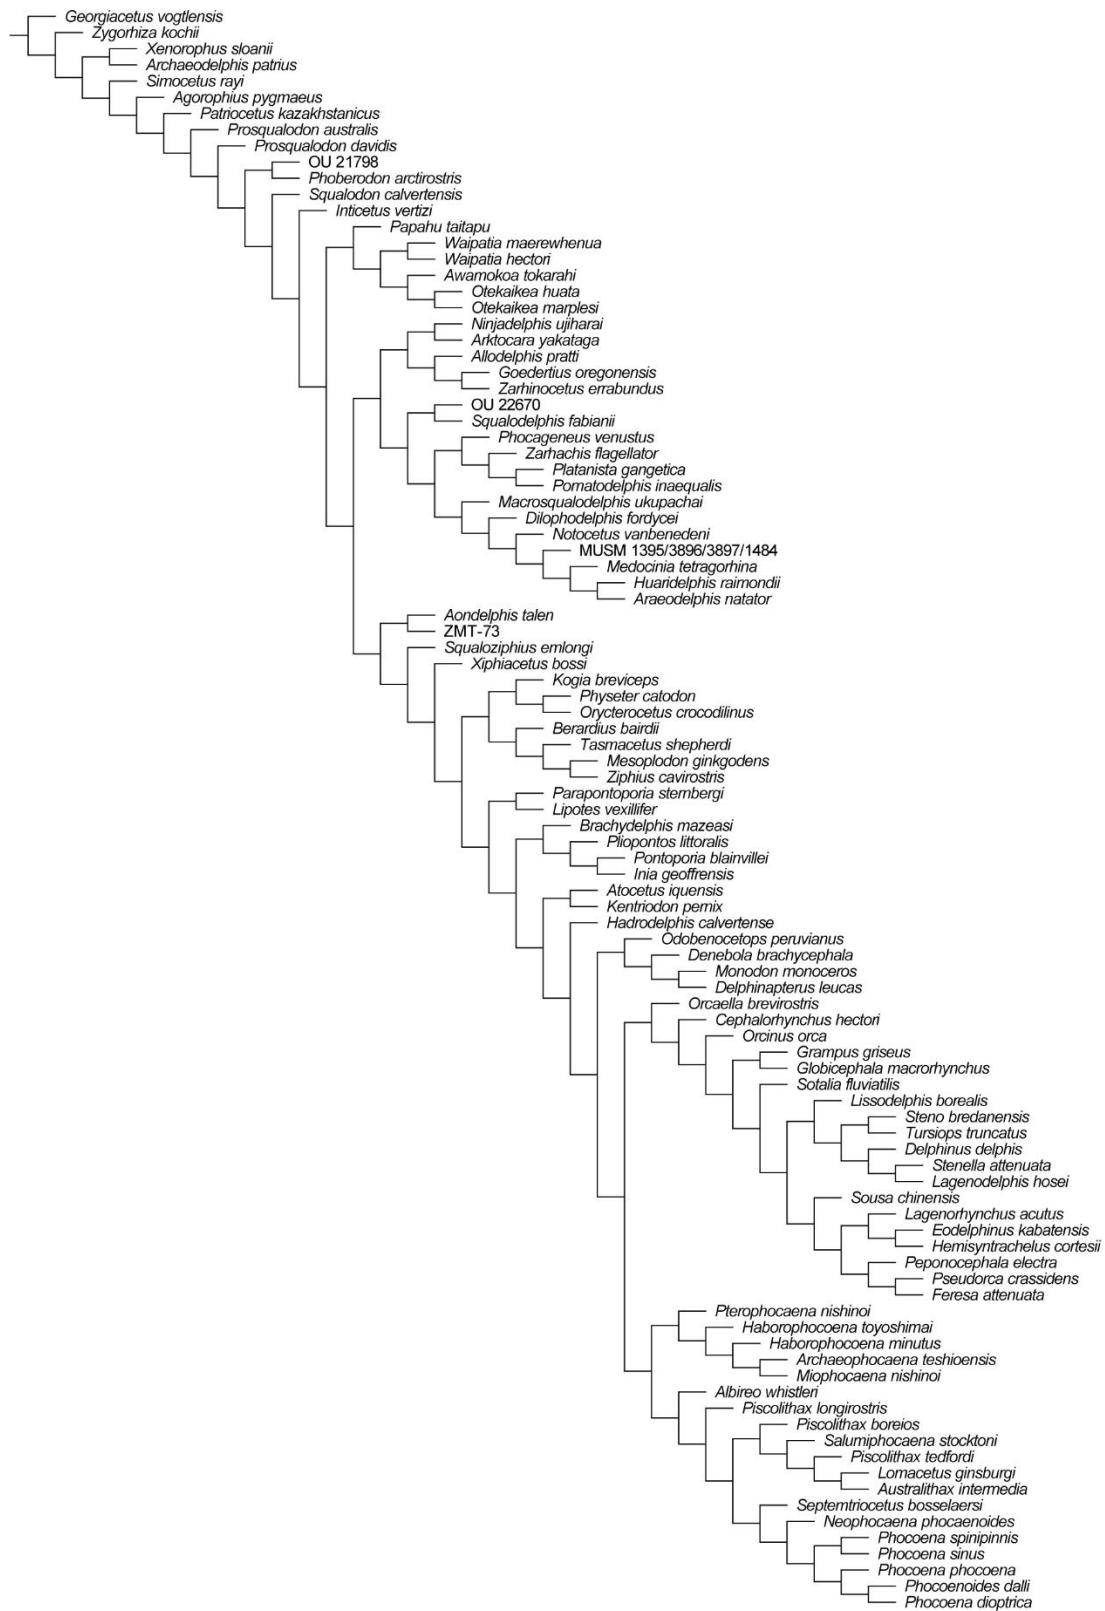

**FIGURE S12.** Full strict consensus of 2 MPTs of the phylogenetic analysis under implied weights with K=4.

**FIGURE S13.** Full strict consensus of 2 MPTs of the phylogenetic analysis under implied weights with K=12.

**FIGURE S14.** Full MPT of the phylogenetic analysis under implied weights with K=16.

**FIGURE S15.** Full MPT of the phylogenetic analysis under implied weights with K=18.

**FIGURE S16.** Full MPT of the phylogenetic analysis under implied weights with  $K=26$ .
