

Assessment of Corrosive Attack on Fe9Cr1Mo alloys in Pressurised CO₂ for Prediction of Breakaway Oxidation
 Supplementary Materials: probability distribution of time to breakaway (TTB and TafterB) by EDF Energy

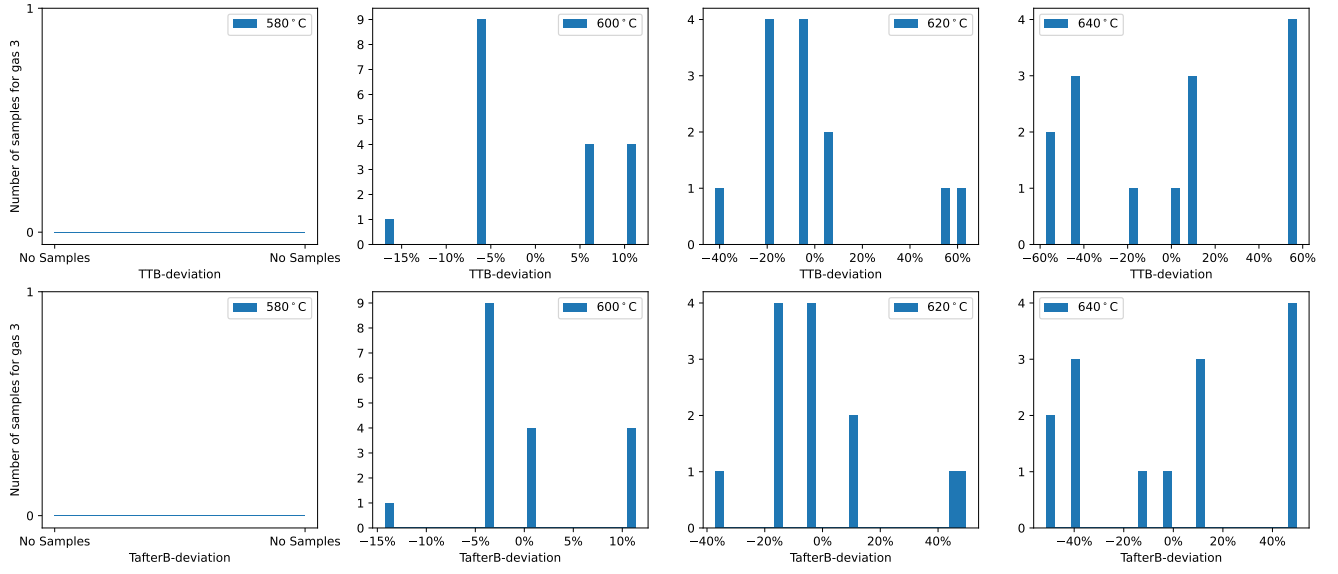

Figure 1: Probability distribution of TTB and TafterB for samples exposed to gas 3, referenced to the average value.

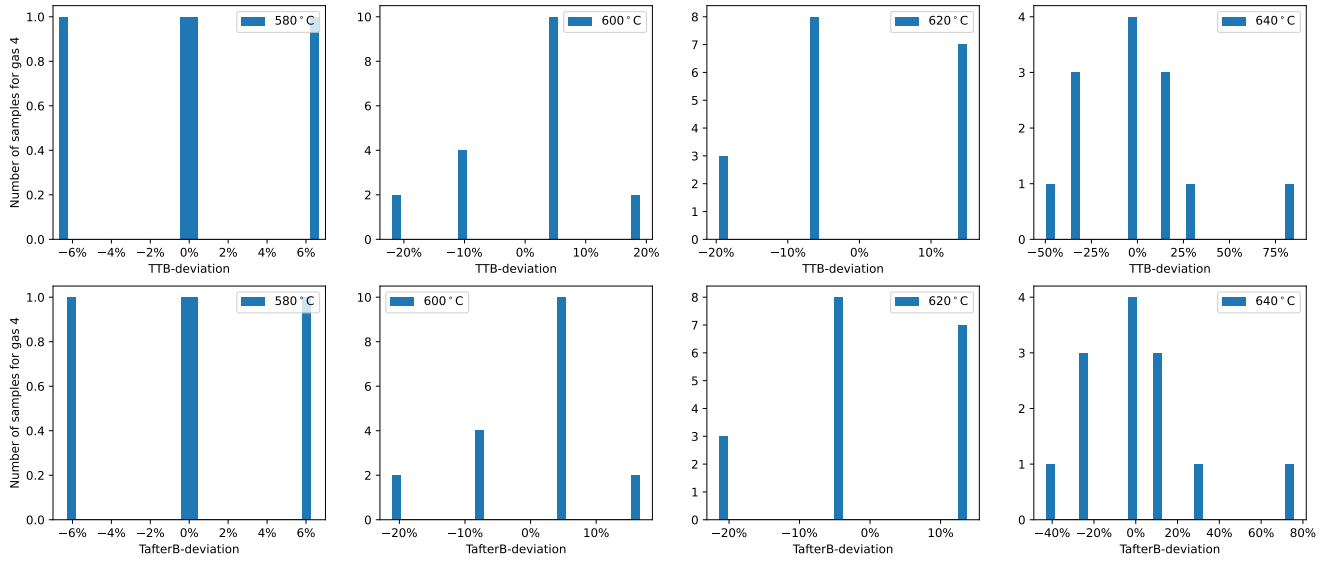

Figure 2: Probability distribution of TTB and TafterB for samples exposed to gas 4, referenced to the average value.
