

S3 File. The timeline of individual runs using the social norm stern-judging.

The Figs A - E show the change in the frequencies of the behavioral and signalling strategies as a function of time for the social norms stern-judging. Numbers on the x axis denote 100 steps.

Parameters: $b=1,2,3,4,5$ for the figures respectively, $n=100$, $c=1$, $\alpha=1$, $\beta=4$, $MST=80\%$.
