

Interview Questions

1. Mention the factors that you will consider in choosing an appropriate debugging strategy for these types of issues.
2. For each factor in the previous response, describe what strategy (or actions) you would take for debugging it.
3. How/why did the factor influence you to choose that strategy and not a different strategy?
4. What strategies would not work for debugging this issue and why?

Possible follow up:

1. The other day in our interview a developer believed given this factor, they chose strategy x. Do you think they were right or wrong? Why?
