

THE RESEARCH EXPLANATION

Dear Participant,

We intend to conduct research on “The Development of E-Supervision Methods for Outpatient Nurses and its Effectiveness on Outpatient Nurses’ Clinical Performance.” This research is part of my dissertation under the supervision of Prof. Dra. Setyowati M.AppSc PhD and Co-Promoters Dr. Dewi Gayatri M.Kes. and Dr. Indra Budi M.Kom.

Regarding the research we will conduct, we would like to explain the following: This research aims to understand how clinical nursing supervision is implemented in outpatient settings. The information you provide in this study is valuable for the future development of supervision. The results of this study will serve as a source of information and a reference for the development of future supervision methods.

You are kindly requested to participate in this study. You have the right to choose whether to participate or decline. If you decide to participate but later wish to withdraw during the data collection process, you will not face any sanctions. This research will not negatively impact your career as an outpatient nurse.

Data collection will be conducted through Focus Group Discussion (FGD) and group discussions. The FGD and group discussions will last between 60-90 minutes. The potential impact during data collection is discomfort during the FGD process. The researcher will minimize this by agreeing on a time and place that is comfortable for the participants. To facilitate the FGD process, the researcher will document the discussion through notes and audio recordings.

The researchers will ensure the confidentiality of the data you provide, which will only be used for research purposes. All notes and recordings related to the research data will be stored digitally, and only the researcher will have access to the data. The research findings will be reported using participant codes, ensuring your identity remains confidential. You have the right to raise objections if you encounter any issues during the research process. The researcher will propose solutions based on mutual agreement. If you are interested in participating in this study, please complete the respondent demographic form and sign the informed consent form attached to this letter. Thank you for your attention and cooperation.

Bukittinggi, September 2022

Best regards,

INFORMED CONSENT

I, the undersigned:

Participant Code/Initials:

Age:

Occupation:

Religion:

Ethnicity:

I hereby declare that I have received an explanation of the research to be conducted. I have understood the information provided by the researcher regarding the purpose, benefits, and procedures of the research. I voluntarily agree to participate in this study. This statement is made truthfully and with full awareness, without coercion from anyone.
