

Interview Plan

Step 1: Read the Product Description

Read the Product description on the other side of this page.

Envision the project as if it was your own.

If you have any questions about the description, feel free to ask!

Step 2: Answer the Interview Questions

Your role in this interview:

Imagine you are the owner of the salon and have commissioned a company to realise your ideas. At the beginning of this process, you are interviewed to find out exactly what you want.

There are no wrong answers in this interview: You don't need any other knowledge, if you don't understand a question, answer like you would in the real world!

Step 3: Complete the Interview and Review the Transcript

After the interview is done, press the Stop Button.

This will open a browser window with the questionnaire and a separate window with the transcript of the interview.

Adjust the windows so you can scroll through the transcript and fill out the questionnaire in the browser.

Step 4: Notify Completion

Inform me that you have completed tasks 1-3.

I will then show you the final step.
