The following scales range from 1 (0%) to 7 (100%).

Please make two marks on each one: place an “x” to signify the actual amount, and an “o” to signify what the ideal amount would have been. Note, the “x” and the “o” can be in the same place.

On the first scale place an “x” to mark the percentage of control you had in the conversation. With an “o” mark what the ideal amount of control would have been. For example if you perceived yourself to be more in control than your partner place the “x” towards the left of the scale, but if you would have preferred more control, place the “o” further to the left. If there was no difference in the amount of control either you or your partner had, put the “x” in the middle of the scale (4).

On this next scale place an “x” to mark the degree to which you dominated the conversation. With an “o” mark what the ideal degree of dominance would have been.
