Regarding the Russian Church I really don't want to say anything because I am Oriental Orthodox. Although, I think a Patriarch should be politically neutral unless there is a political force that directly threaten Christianity, just like the Coptic Pope or Syriac Patriarch. I also believe that nuclear weapons are a bad thing and should never have been invented but I also can understand why and somewhat agree on brinkmanship in some cases. If you're a country getting "bullied" by all Liberal Globalists I can understand why you would flaunt your nuclear weapons. Note to the author: I think Putin is equally as bad as Liberal Globalism. I don't support any parts here but my example of a country getting bullied I'm thinking more of the Syrian Republic. If the government wasn't there Christians would be mass murdered and in that case I can understand and support if Assad would flaunt with nuclear weapons to Globalists, islamists and zionists.

I do not agree with the policy of nuclear weapons because all wars are against humanity and are of satanic manufacture.

How can we say nuclear weapons is a blessing when God tells us to love all

I'm not kidding that Russia is behind nuclear weapons. We must all do as it is written in the Bible. We must all protect ourselves together. Orthodox believers and Catholics must protect the European communities and Europe together with America from being the same. We must protect Europe from Islamization. We must protect all Scandinavian countries from Islamization. We must not allow Muslims to be leaders in Europe. It is known who should be the leaders in Europe. Too much discrimination has started. Groups are formed in every company, if the boss is a Muslim, then all the workers are Muslims. And we, who are Orthodox and Catholics, should not be discriminated against. Everyone has the right to go to SFI schools, except me, white people, Orthodox and Catholics. I want all other European countries to be witnesses at a high level, so that it is known that Europe was created by the Soldiers of Christ. That is known. They are the Templars. They created the whole system and Europe. We should not destroy their contribution to Europe. We have to be harmonious and together as we create a Templar marriage.

The question of morality is a bit blur. In Theory we can dream all we want about a world without war, weapons and nuclear weapons - but the cold harsh reality urges us to re-think.

The use of nuclear weapons is perhaps the most dangerous prospect for humanity.

I think that it is important to provide a theological delegitimation of nuclear weapons.

I don't believe that orthodox Christian civilization must be militarily defended against negative liberal western influence. Instead through peaceful resolution and diplomacy is the right way for Christianity liberal according to the gospel. God gives peace for us, so we have to live in peace.

I feel ambiguous on some of these questions because I have don't dealt with moral problems like the issue of "just war" in depth.

May God have Mercy upon us

ESV For we do not wrestle against flesh and blood, but against the rulers, against the authorities, against the cosmic powers over this present darkness, against the spiritual forces of evil in the heavenly places.

How can we be loving and allow weapons to exist

Good

The use of nuclear weapons will put the world on the brink of extinction.

In the modern world, any weaponry is an abuse of humanity. I think that military powers are to be eliminated as provoking death-threatening conflicts for humanity and that all armed forces are to be dismissed as an atavism of the past epoch. All these colonels and generals are miserable losers and infants playing the dangerous game and provoking conflicts for the sole reason: their "toys" are seductive. At the same time, their medals are fake souvenirs of false glory and arrogance. Each human being is a universe, and that humanism must be the motto of modern society. The hate and conflicts are provoked by lousy politicians whose only goal is the next elections and who are backed by useless warmakers for the sake of corporations that make fortunes on our deaths. I also would like to thank you for your work as you hit my pain point: I observe how those who rule the world go easy on the Third World War issue, persuading people they can overcome this like an ordinary typhoon or an earthquake. We have to stop talking about WW3 as we have to reject the possibility of this event. If Putin wants to become a radioactive trash, I respect his will, but it does not mean we have to follow his intentions. Stop accepting the idea of WW3! It is like sin's first stage: adoption of the concept of sin leads to sin. Equally, the adoption of the idea of WW3 leads to the elimination of humanity!

I suggest that using nuclear energy as a source of energy is not considered as a problem, because God gives us this world to use properly in freedom. The problem is using it as a weapon will cause the destruction of God's creations and it leads to us sins.
