

Game Instructions

On your bench you will find key pieces of equipment used in Biomedicine laboratories. You will also find identification labels and accuracy markers.

1. Remove the labels and accuracy markers from the envelope on your bench.
2. Using your knowledge of laboratory equipment, assign each of the identification labels to the equipment.
3. Check your answers with a staff member.
4. If all are correct, separate the accuracy markers into three groups.
5. Allocate each of your equipment to the accuracy markers based on how accurate it would be for measuring liquids.
6. Check your answers with a staff member.
7. Once completed, return all labels and accuracy markers to the envelope.
