1. Do you know what native plants are used in the Landcare restoration project?

2. Which of those plants do you recognize from the time you were working on-site?

● Yes ● No ● Maybe

- (1) Carpobrotus glaucescens
- (2) Canavalia rosea (Sw.) DC.
- (3) Scaevola calendulacea (Andrews) Druce
- (4) Acacia longifolia (Andrews) Willd.
- (5) Spinifex sericeus R.Br.
- (6) Themeda triandra Forssk.

3. Do you know that Spinifex sericeus R.Br, Carpobrotus glaucescens, Canavalia rosea (Sw.) DC and Scaevola calendulacea (Andrews) Druce are in front of dune plants and tolerate a significant level of salt and wind?

4. Do you know that *Acacia longifolia* (Andrews) Willd is a barrier to reduce salt and wind damage and is usually planted in a second layer th at blocks the wind?

5. If you could choose two of the six plants below to have a robotic version, which would they be?

6. Can you explain why you chose these two?
