Author Note

This index contains the full sequence of scientific papers, models, and observational confirmations authored by **J.D.S. aka Drippy (No Formal Training)**. It serves as a permanent record of the construction and validation of the Oscillatory Field Genesis (OFG) cosmology and its related systems.

- Future entries will track Betelgeuse neutrino lag, LSST filament orientation, and CMB-S4 low- ℓ anisotropy.

Declaration

All material in this index was created by **J.D.S. (Drippy)**, independently and prior to public confirmation. Ideas were documented before observational matches were confirmed, establishing OFG as a forward-predictive cosmology.
