

1) Download and Print

Beware!

Ensure the orientation is the same for both sides before printing or gluing, i.e. both sides should have the same.

New table

	Outer side	Inner side
Sheet 1		
Sheet 2		
Sheet 3		

You have two options:

Option 1:

Double sided print such that three A4 sheets are printed in total. The pages in the PDF are in the correct order for double sided printing. A landscape and portrait version of the Zine is provided so you can pick the one that is easiest for you and your printer to get the orientation right.

Option 2:

Singe sided print then glue the inner and outer sides together. Landscape or portrait, it doesn't matter.

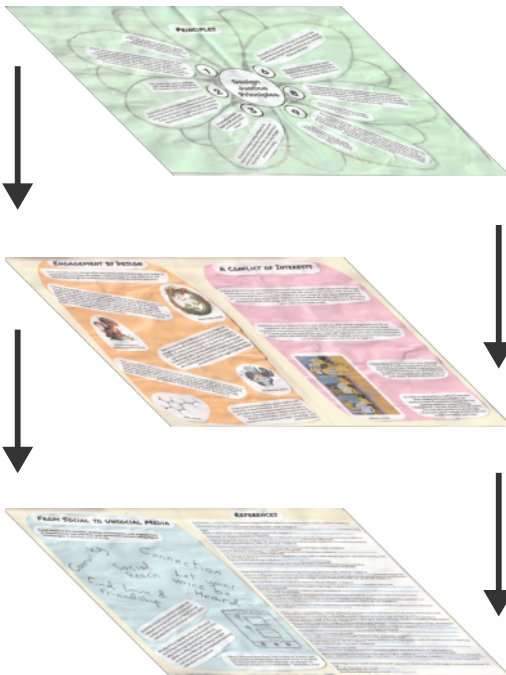

2) Fold and Order

Fold

Carefully find the centre of each piece then crease and fold them. This makes it easier to order and align.

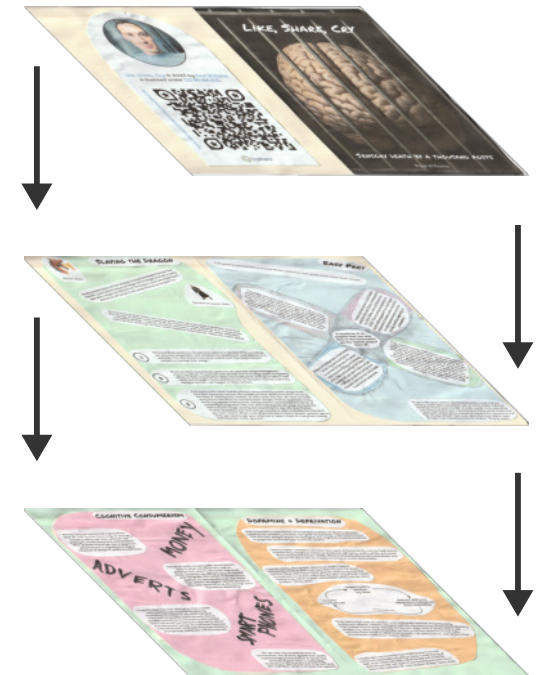

Stack with inner sides facing up

Order and Align

Now lay the sheets in order so the inner sides are facing the same way (and outer sides are facing the same way too). Ensure the sheets have their text facing the same way.

Stack with outer sides facing up

3) Bind Sheets Together

Bind the sheets using any method you like. Here's a few you could use.

Possibility 1:

Staple the sheets together along the fold.

Possibility 2:

Use string or thick thread to sew the sheets together along the fold.

Possibility 3:

Use glue. This is not recommended because it's not very robust and it's too easy to glue pages together by accident. Use a glue gun if possible.
