Dear Dr. Rattner,

Thank you for the provisional acceptance of our manuscript, "*ATRX binds to atypical chromatin domains at the 3' exons of ZNF genes to preserve H3K9me3 enrichment*" for *Epigenetics*. Reviewers 2 & 3 continue to view our work favorably and we have satisfied their main concerns at this time. As per your instructions, we have edited the text accordingly to the reviewers' suggestions, but have not performed additional experiments at this time.

Please find the point-by-point response letter and the revised version of our manuscript enclosed.

Thank you for your time and consideration of our revised manuscript.

Sincerely,

Emily Bernstein, PhD
