

*Ecological Archives*

Zhenhua Luo, Zhigang Jiang, and Songhua Tang. Impacts of climate change on distributions and diversity of ungulates on the Tibetan Plateau. *Ecological Applications*.

Appendix B. Occurrence records, Jack-knife analysis result, and distributional predictions of single species for the current, 2020, 2050 and, 2080 under the full and zero dispersal hypotheses.

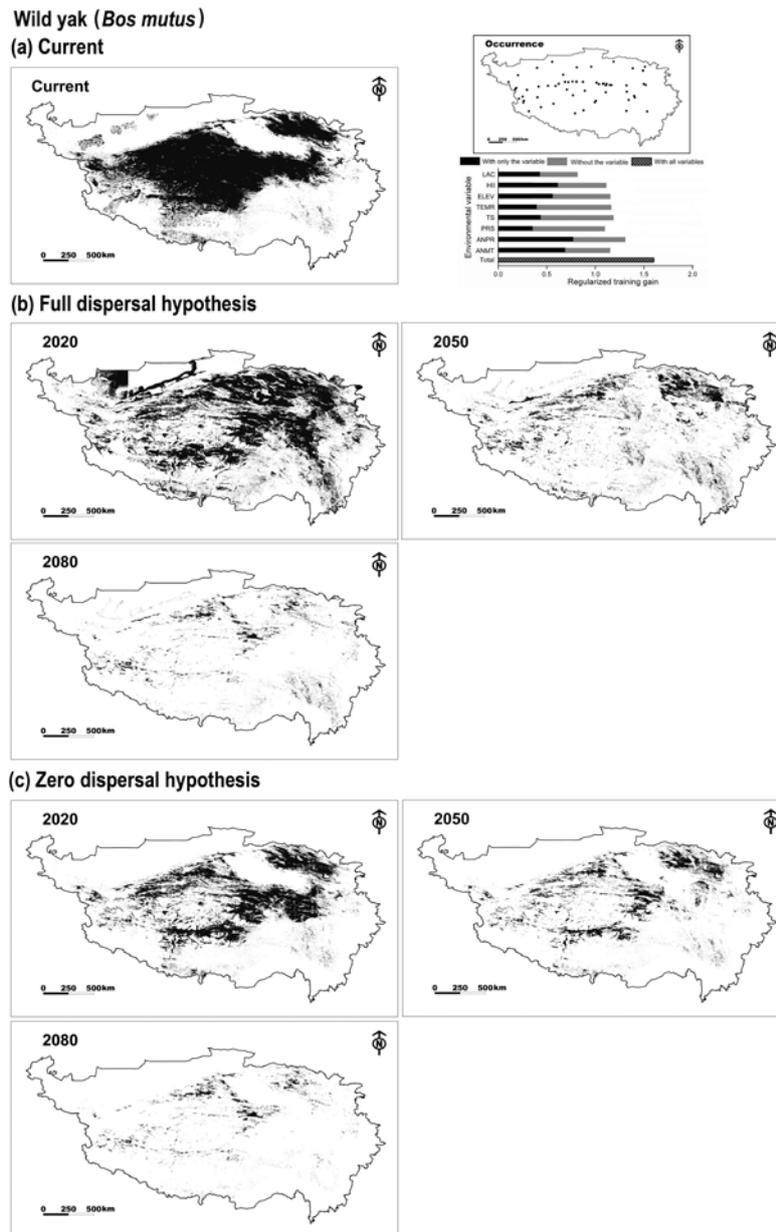

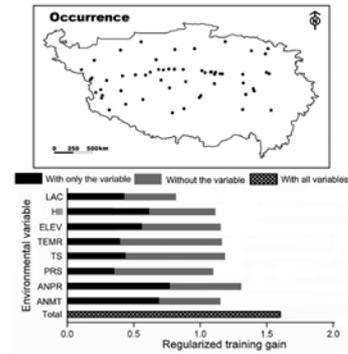

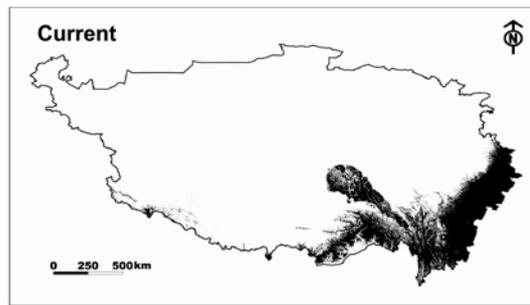

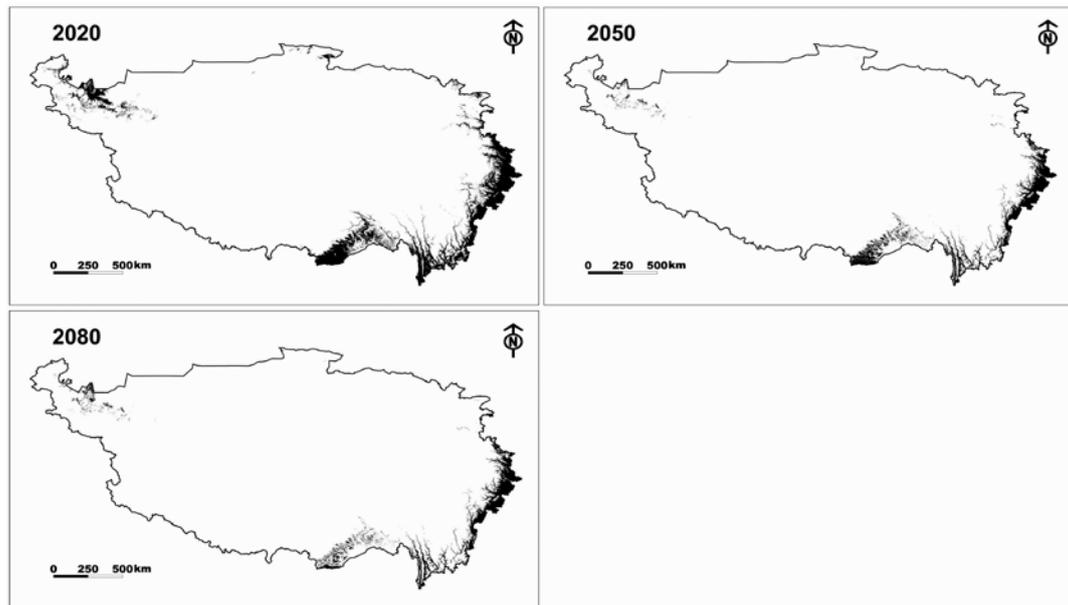

FIG. B1. Occurrence records, Jack-knife analysis, and potential current and future distributions under full and zero dispersal hypotheses of wild yak (*Bos mutus*).

**Takin (*Budorcas taxicolor*)**

**(a) Current**

**(b) Full dispersal hypothesis**

**(c) Zero dispersal hypothesis**

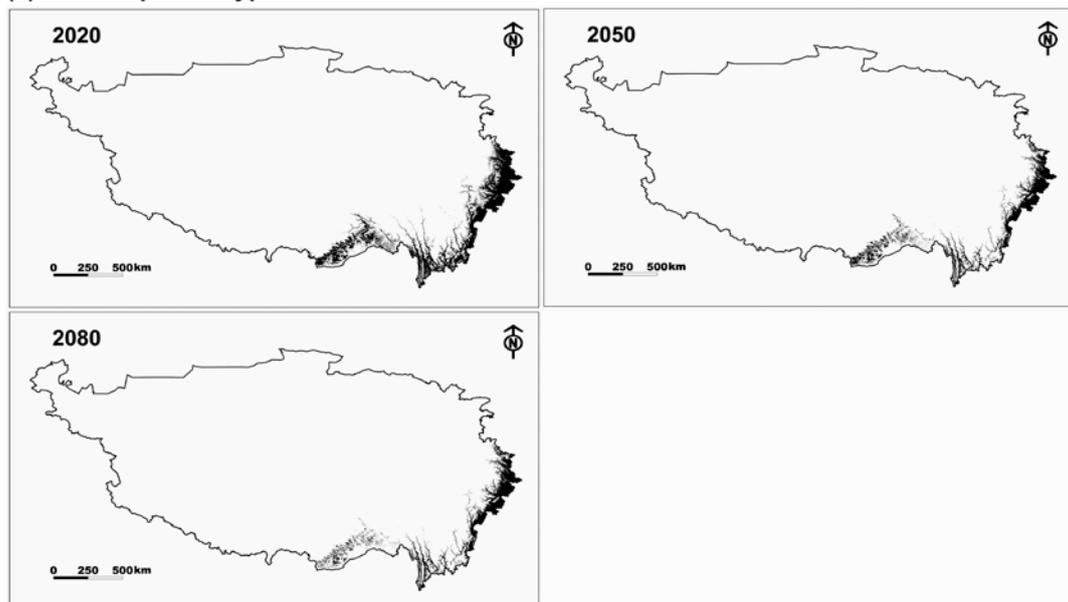

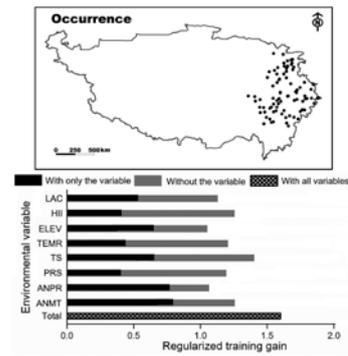

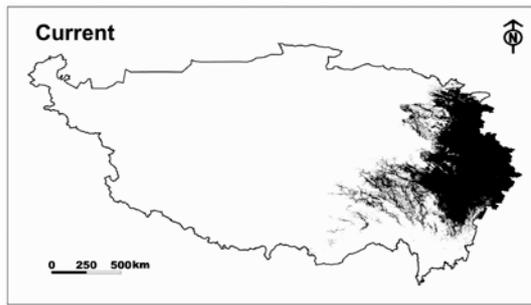

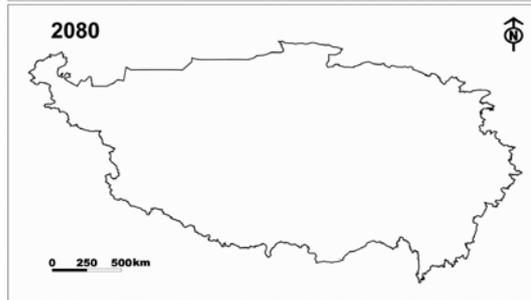

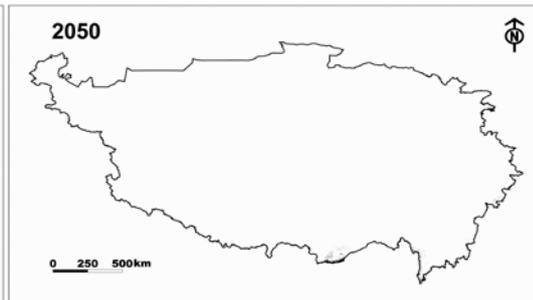

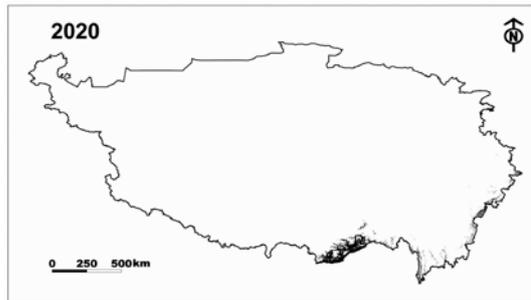

FIG. B2. Occurrence records, Jack-knife analysis, and potential current and future distributions under full and zero dispersal hypotheses of takin (*Budorcas taxicolor*).

**Eastern roe deer (*Capreolus pygargus*)**

**(a) Current**

**(b) Full dispersal hypothesis**

**(c) Zero dispersal hypothesis**

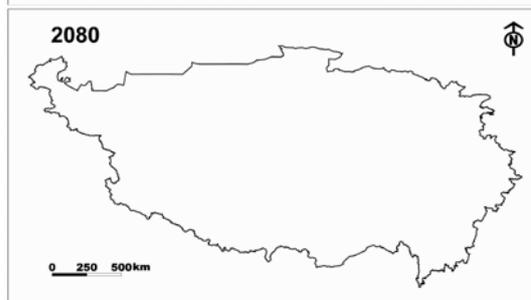

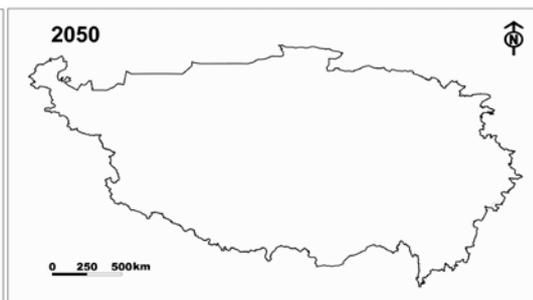

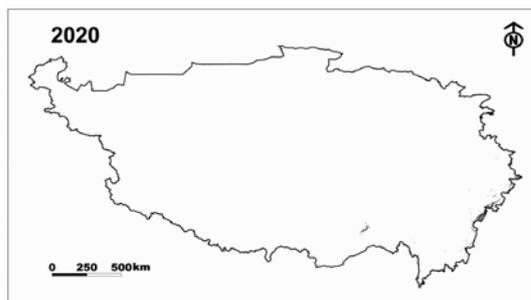

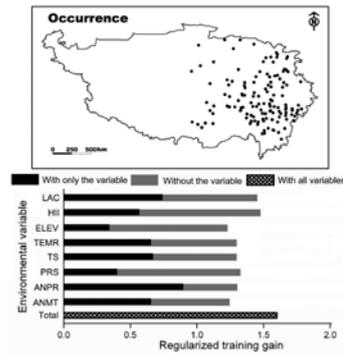

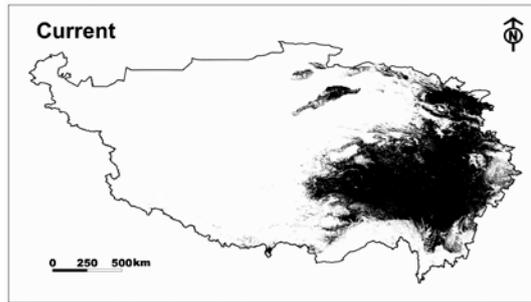

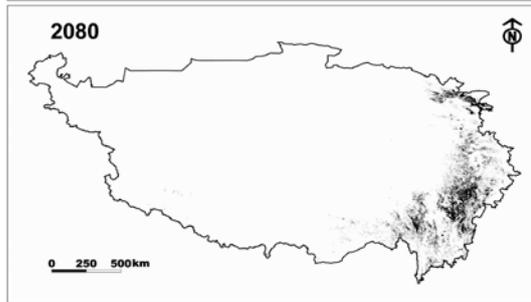

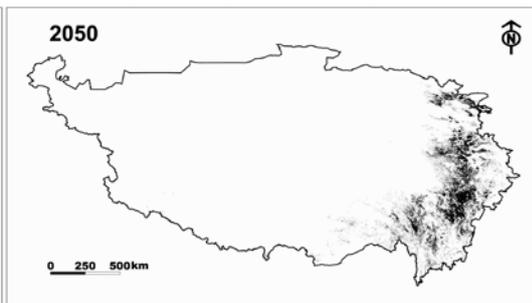

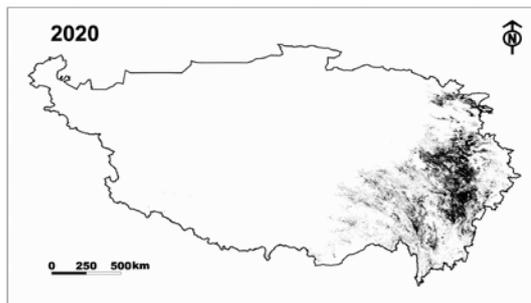

FIG. B3. Occurrence records, Jack-knife analysis, and potential current and future distributions under full and zero dispersal hypotheses of eastern roe deer (*Capreolus pygargus*).

**Thorold's deer (*Cervus albirostris*)**

**(a) Current**

**(b) Full dispersal hypothesis**

**(c) Zero dispersal hypothesis**

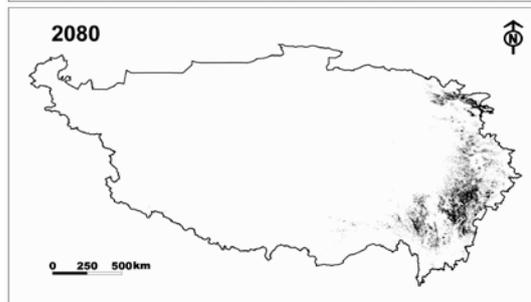

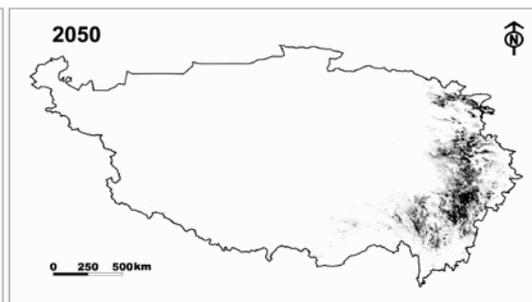

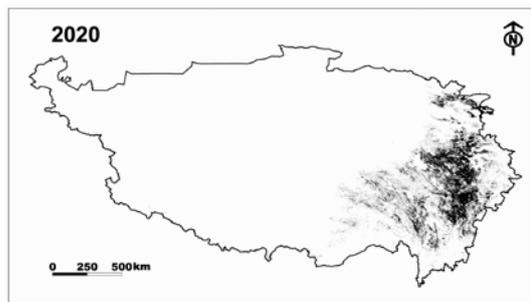

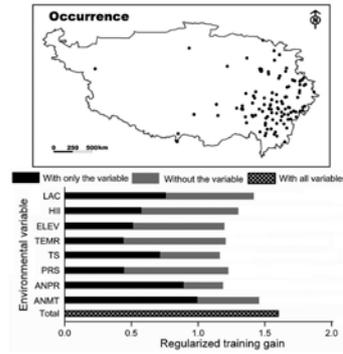

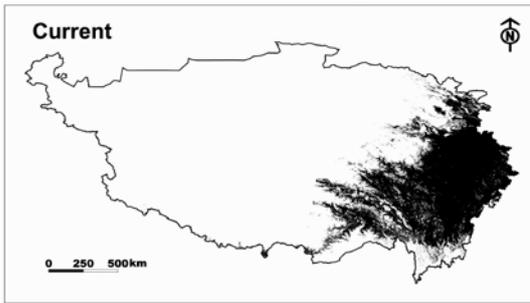

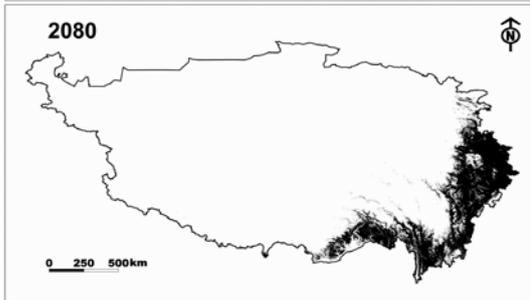

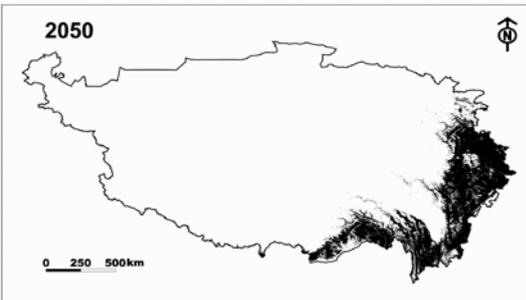

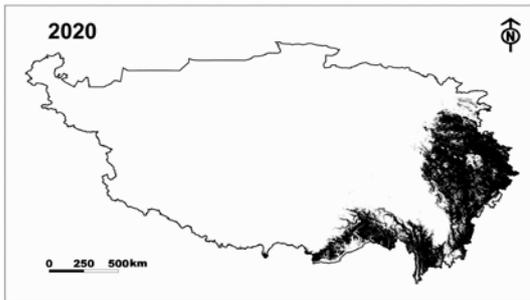

FIG. B4. Occurrence records, Jack-knife analysis, and potential current and future distributions under full and zero dispersal hypotheses of Thorold's deer (*Cervus albirostris*).

**Red deer (*Cervus elaphus*)**

**(a) Current**

**(b) Full dispersal hypothesis**

**(c) Zero dispersal hypothesis**

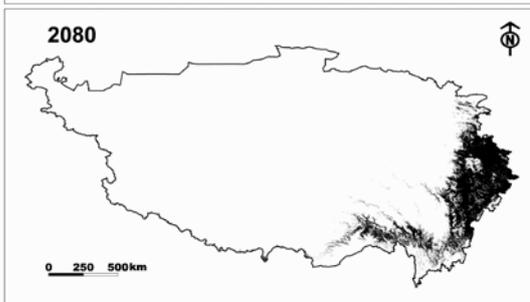

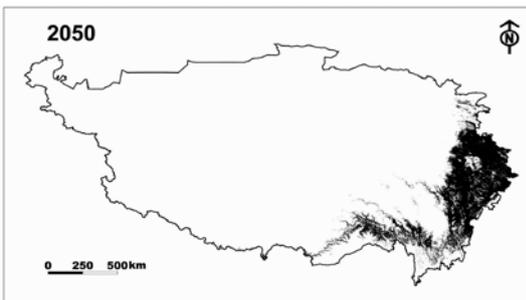

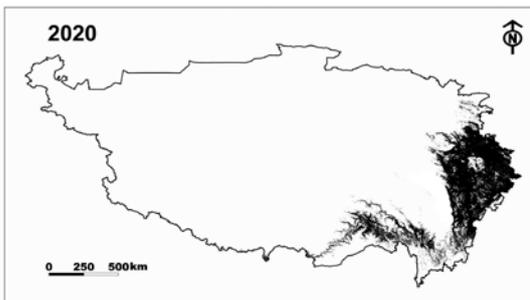

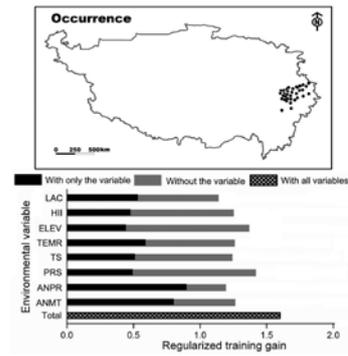

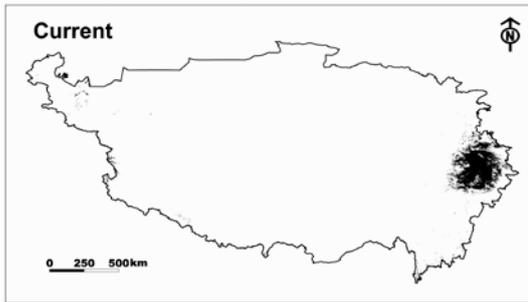

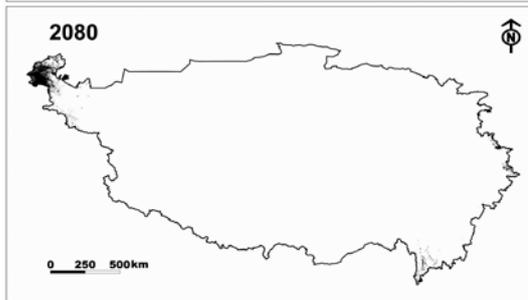

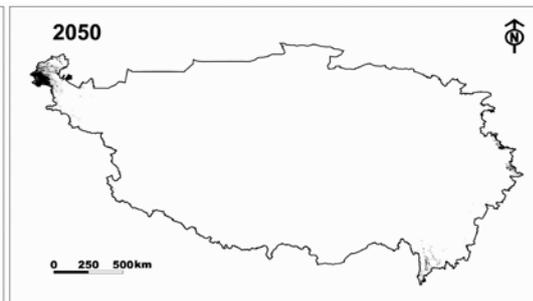

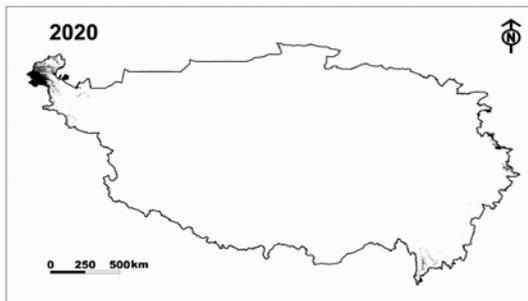

FIG. B5. Occurrence records, Jack-knife analysis, and potential current and future distributions under full and zero dispersal hypotheses of red deer (*Cervus elaphus*).

Sika deer (*Cervus nippon*)

(a) Current

(b) Full dispersal hypothesis

(c) Zero dispersal hypothesis

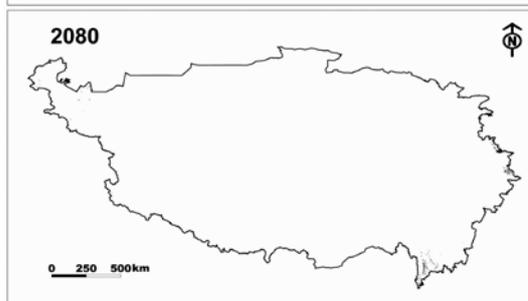

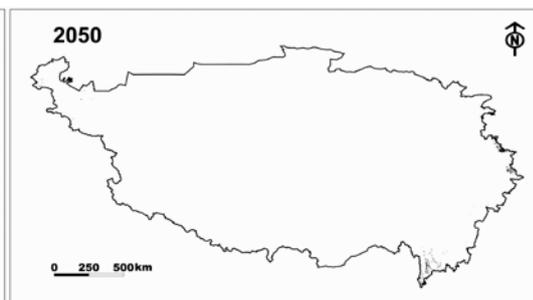

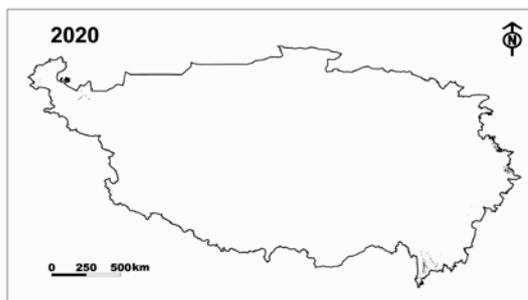

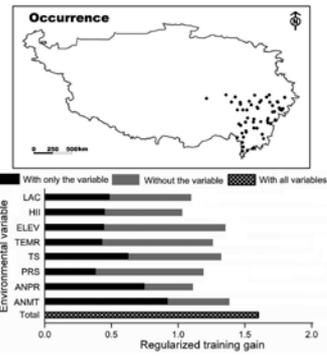

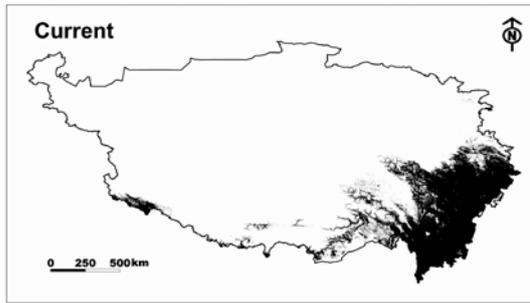

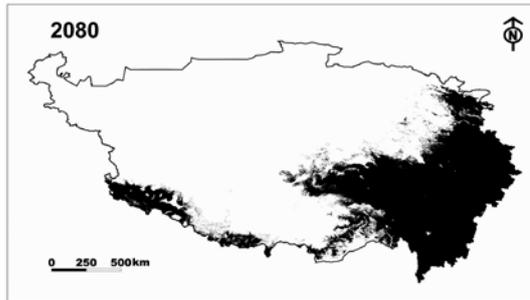

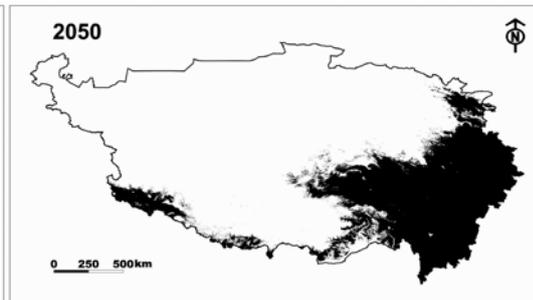

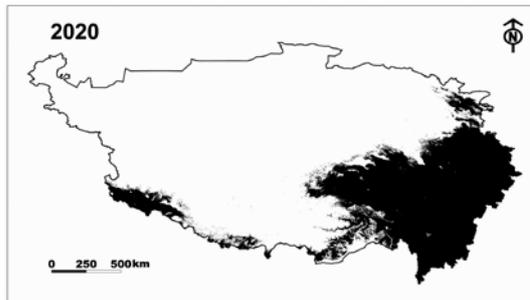

FIG. B6. Occurrence records, Jack-knife analysis, and potential current and future distributions under full and zero dispersal hypotheses of sika deer (*Cervus nippon*).

**Sambar (*Cervus unicolor*)**

**(a) Current**

**(b) Full dispersal hypothesis**

**(c) Zero dispersal hypothesis**

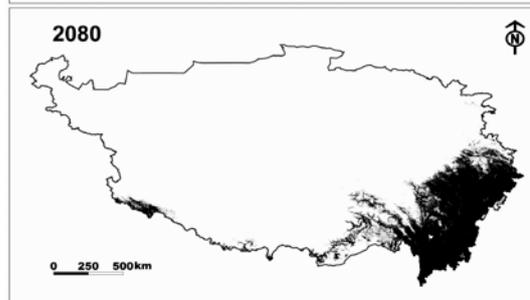

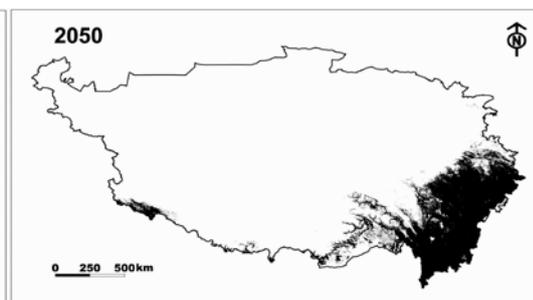

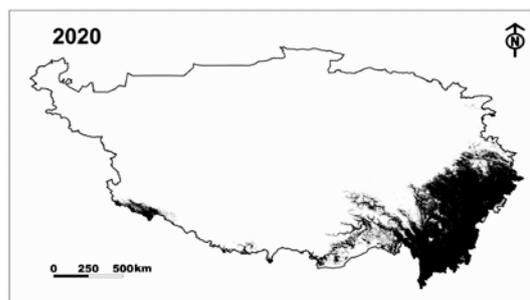

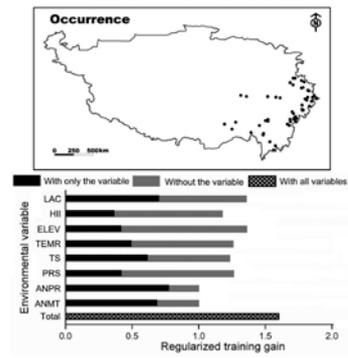

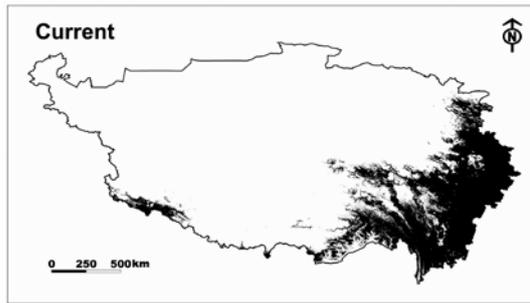

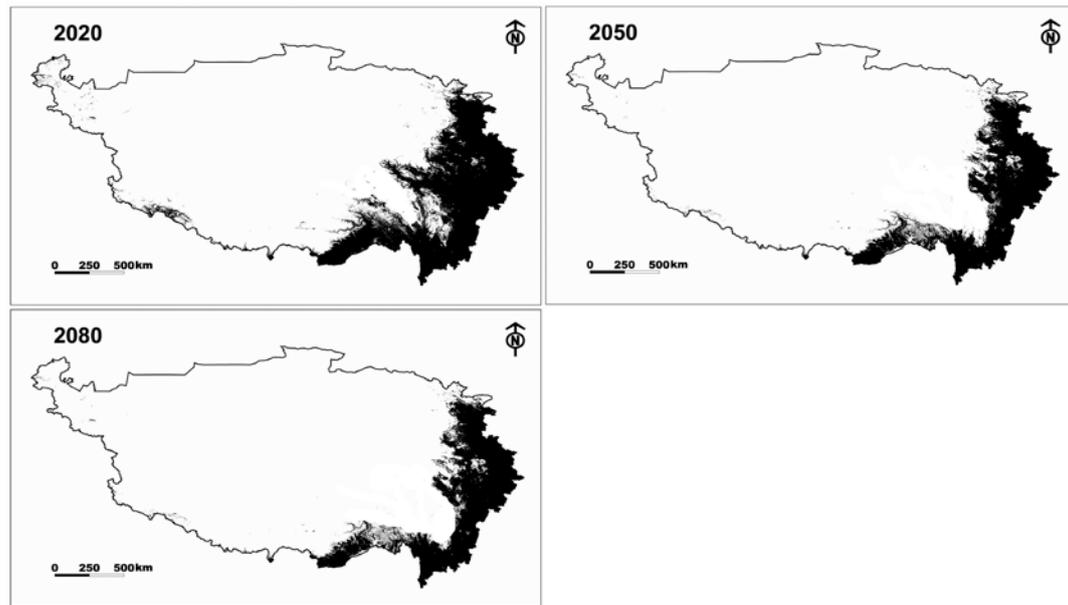

FIG. B7. Occurrence records, Jack-knife analysis, and potential current and future distributions under full and zero dispersal hypotheses of sambar (*Cervus unicolor*).

**Tufted deer (*Elaphodus cephalophus*)**

**(a) Current**

**(b) Full dispersal hypothesis**

**(c) Zero dispersal hypothesis**

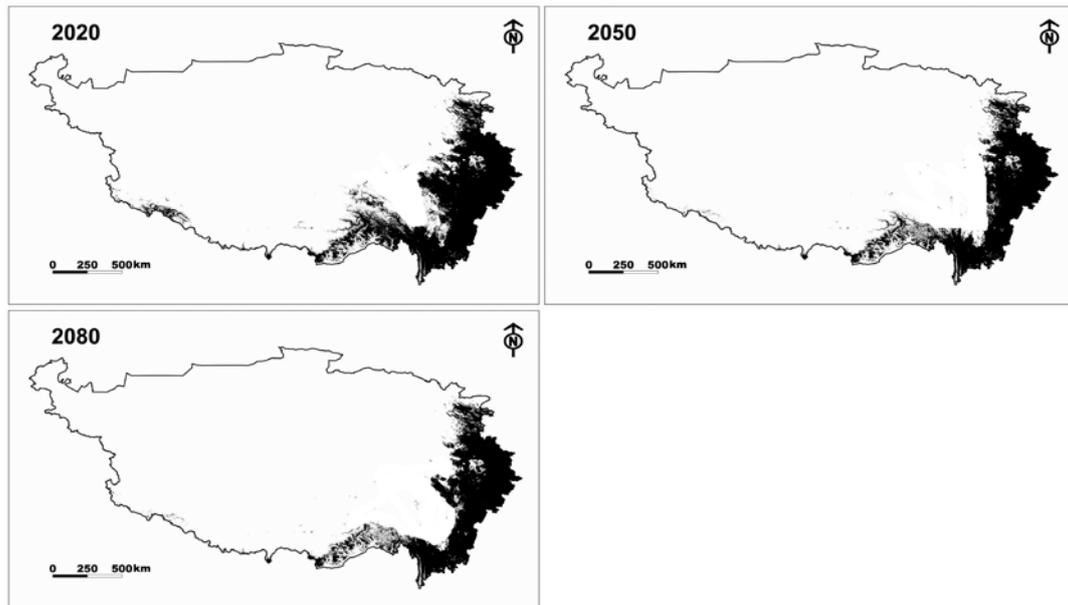

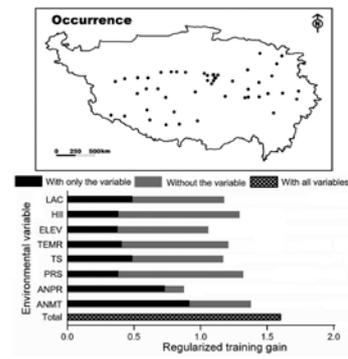

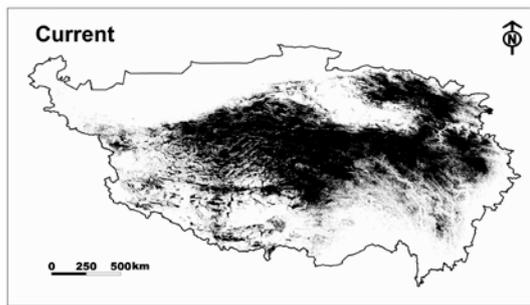

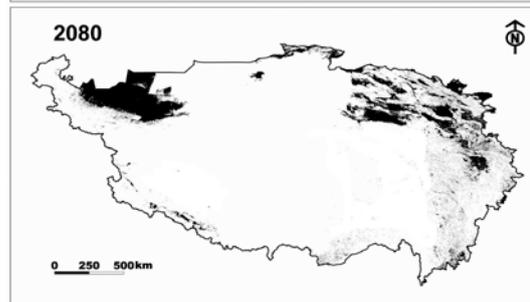

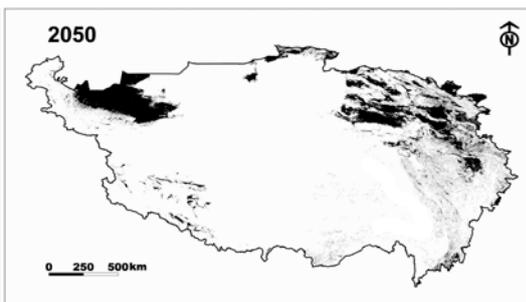

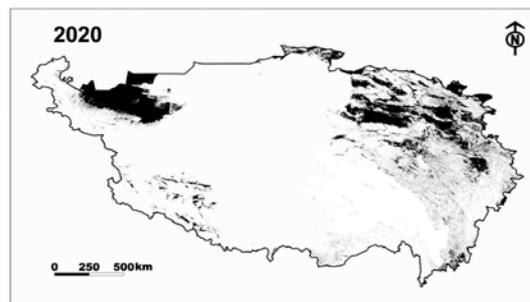

FIG. B8. Occurrence records, Jack-knife analysis, and potential current and future distributions under full and zero dispersal hypotheses of tufted deer (*Elaphodus cephalophus*).

**Kiang (*Equus kiang*)**

**(a) Current**

**(b) Full dispersal hypothesis**

**(c) Zero dispersal hypothesis**

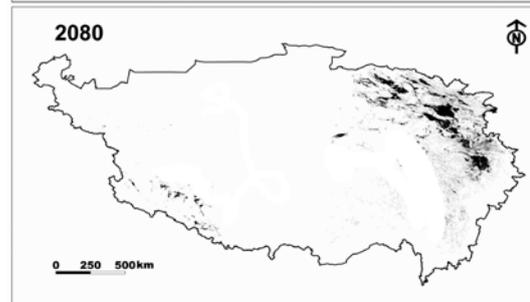

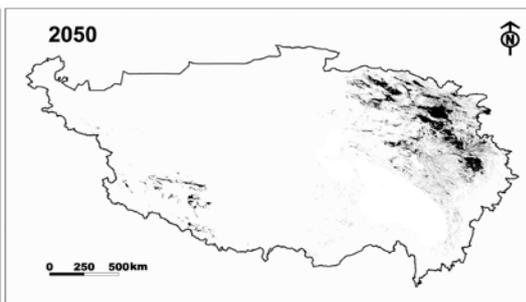

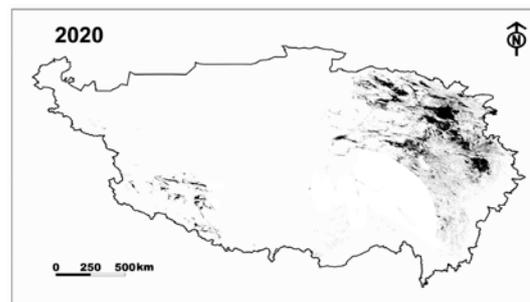

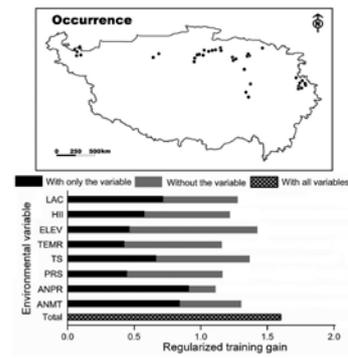

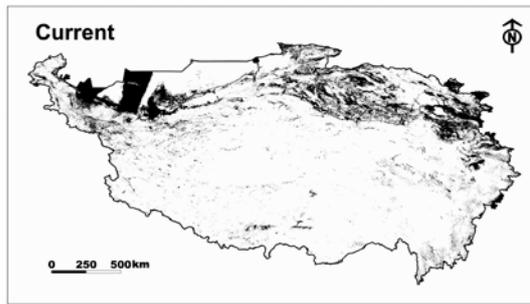

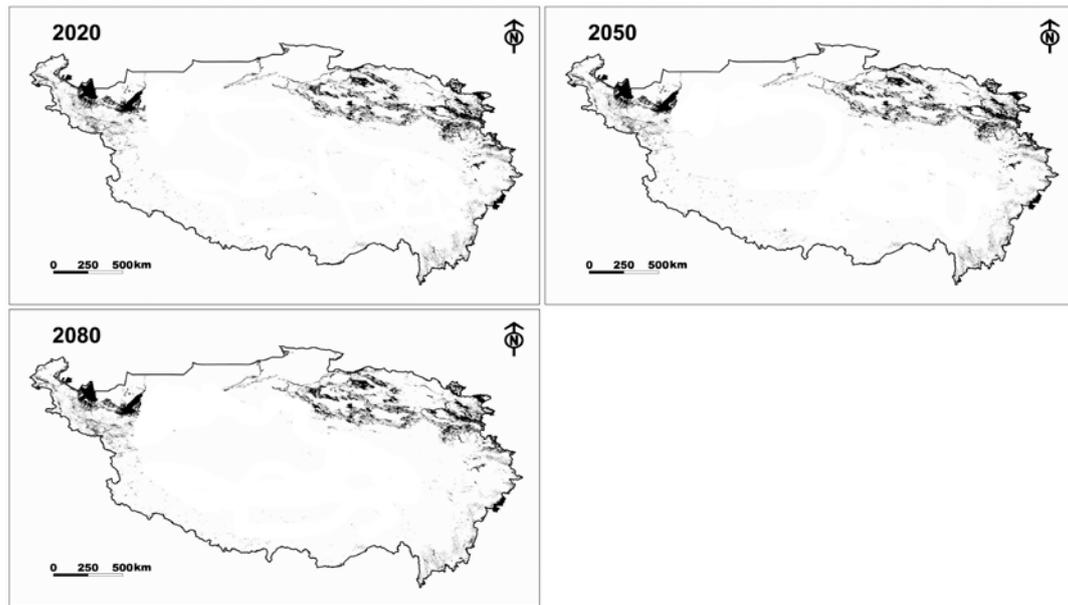

FIG. B9. Occurrence records, Jack-knife analysis, and potential current and future distributions under full and zero dispersal hypotheses of kiang (*Equus kiang*).

**Goitered gazelle (*Gazella subgutturosa*)**

**(a) Current**

**(b) Full dispersal hypothesis**

**(c) Zero dispersal hypothesis**

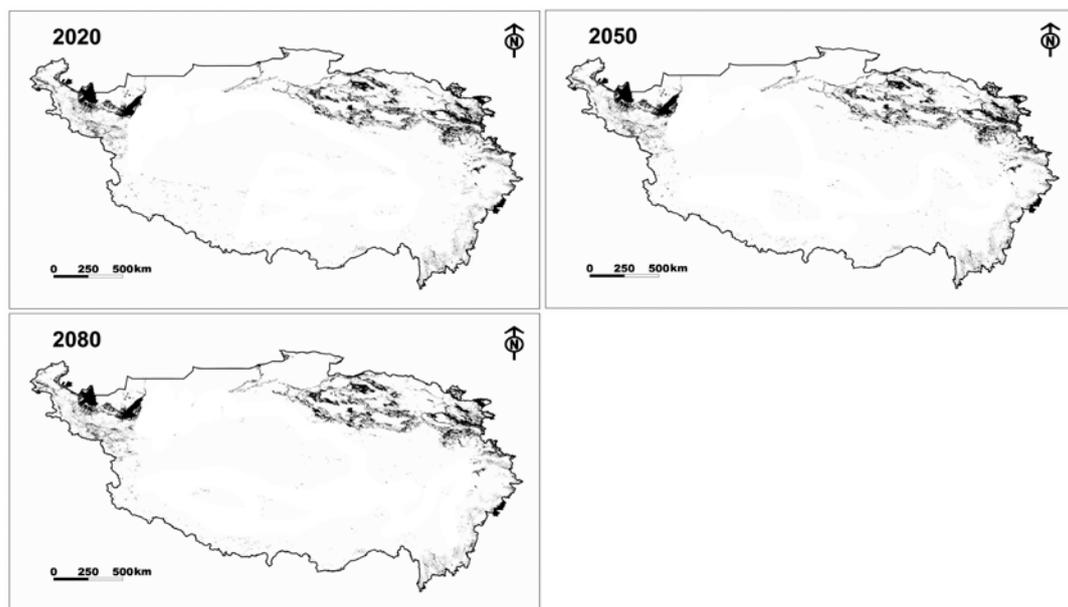

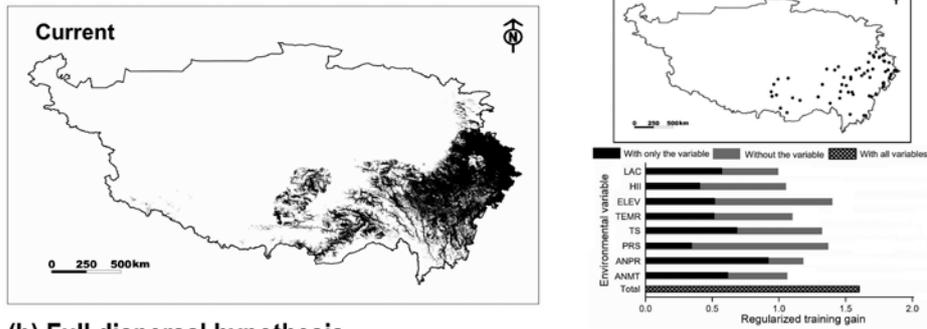

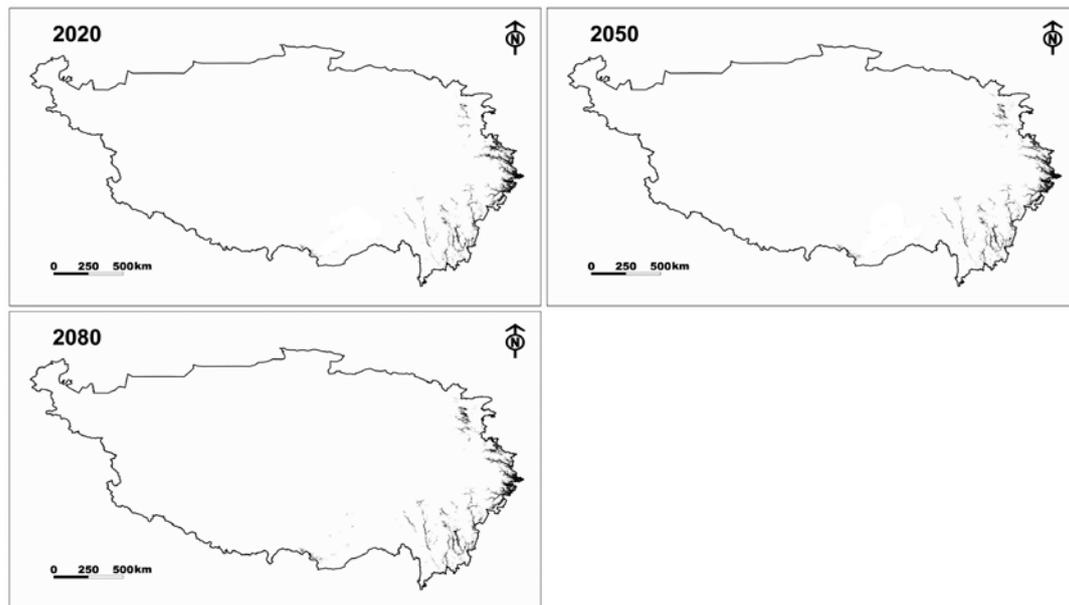

FIG. B10. Occurrence records, Jack-knife analysis, and potential current and future distributions under full and zero dispersal hypotheses of goitered gazelle (*Gazella subgutturosa*).

Chinese forest musk deer (*Moschus berezovskii*)

(a) Current

(b) Full dispersal hypothesis

(c) Zero dispersal hypothesis

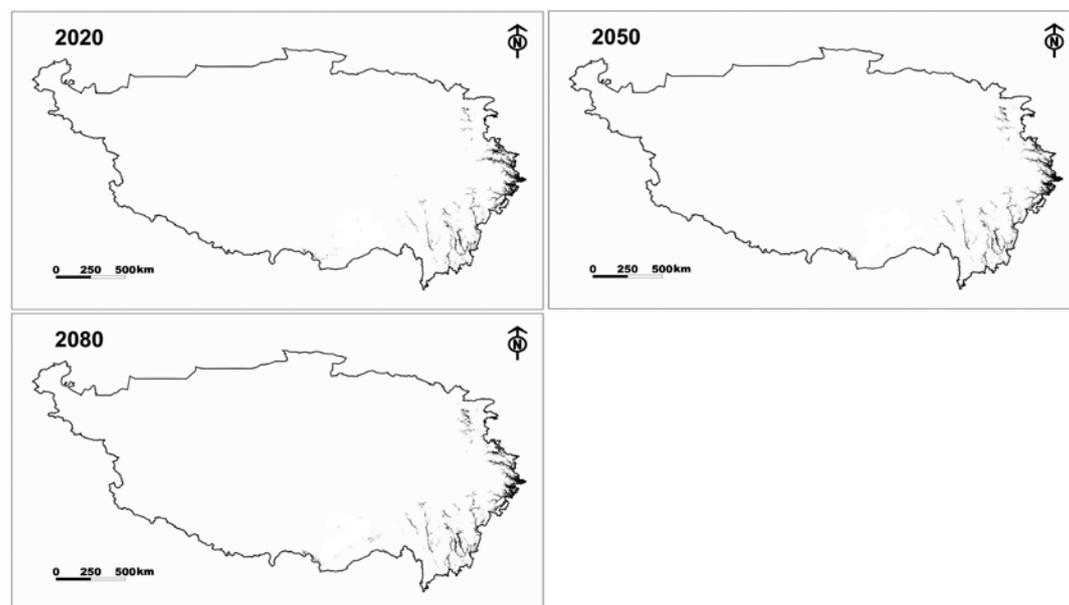

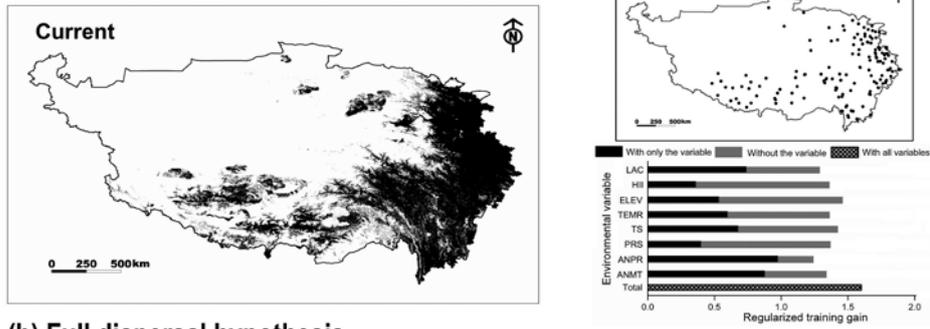

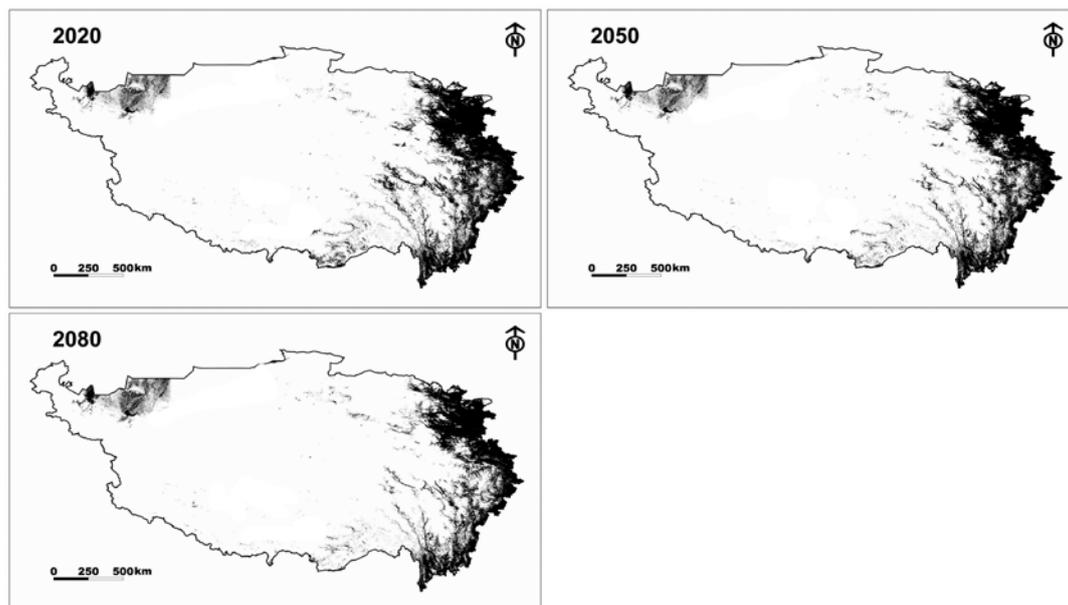

FIG. B11. Occurrence records, Jack-knife analysis, and potential current and future distributions under full and zero dispersal hypotheses of Chinese forest musk deer (*Moschus berezovskii*).

## Alpine musk deer (*Moschus chrysogaster*)

### (a) Current

### (b) Full dispersal hypothesis

### (c) Zero dispersal hypothesis

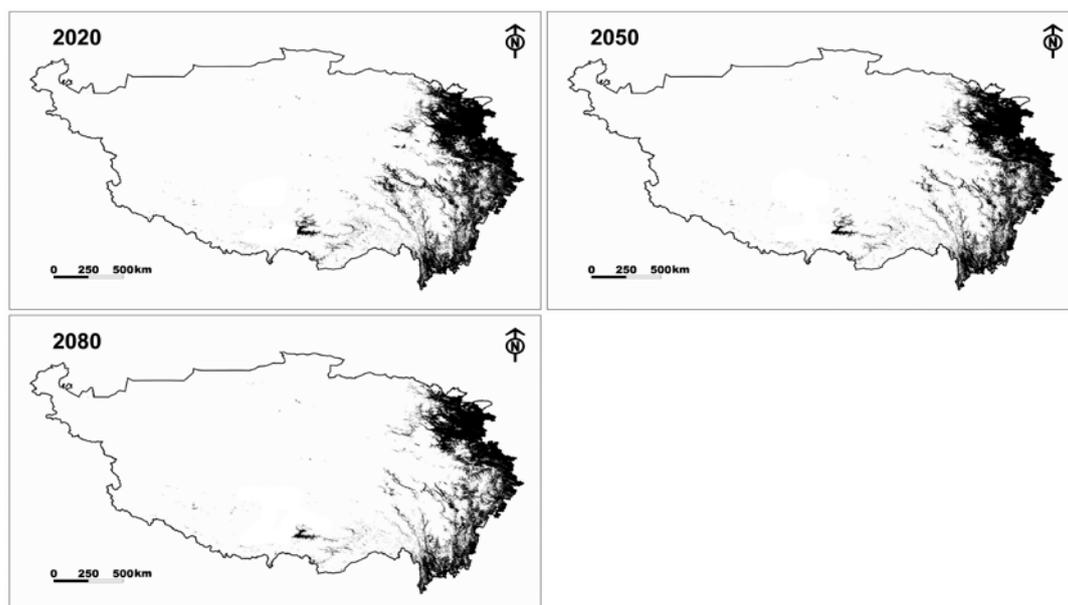

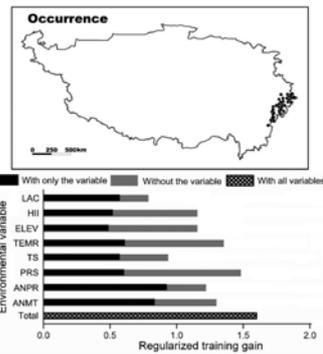

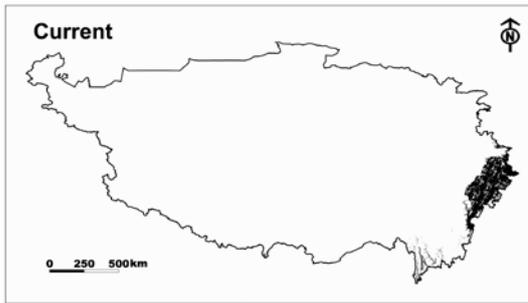

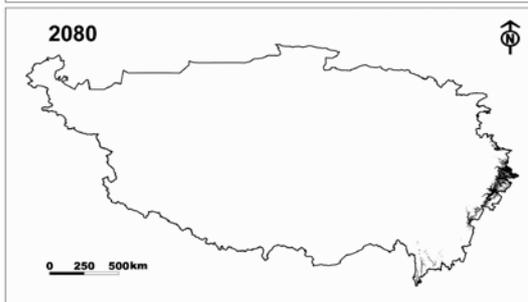

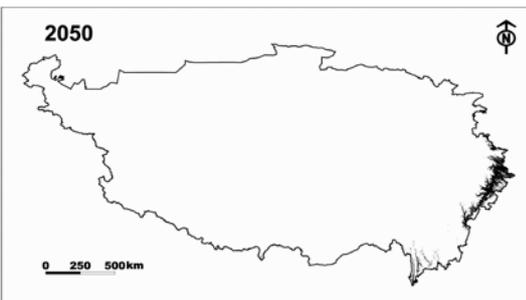

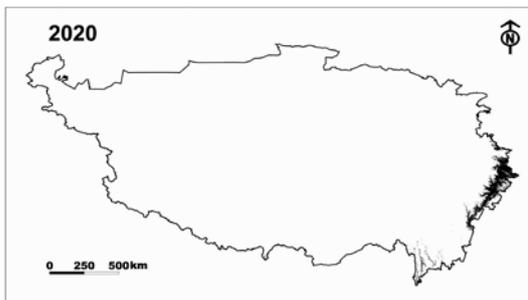

FIG. B12. Occurrence records, Jack-knife analysis, and potential current and future distributions under full and zero dispersal hypotheses of Alpine musk deer (*Moschus chrysogaster*).

Reeves's muntjac (*Muntiacus reevesi*)

(a) Current

(b) Full dispersal hypothesis

(c) Zero dispersal hypothesis

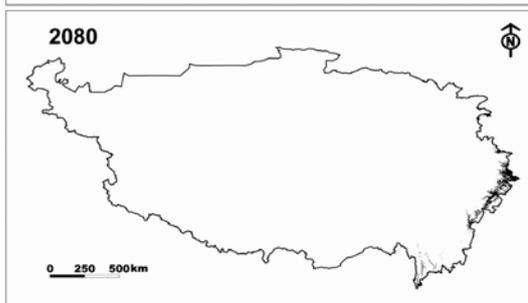

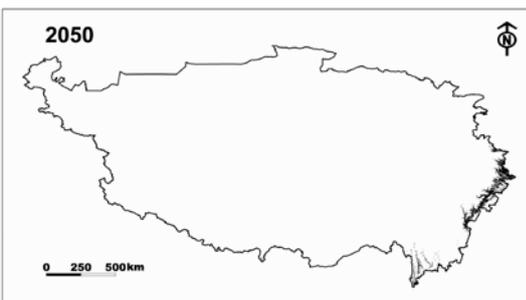

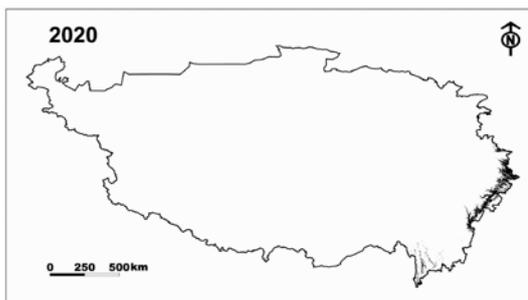

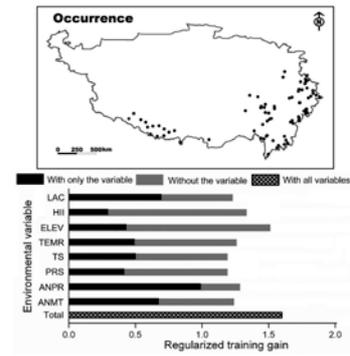

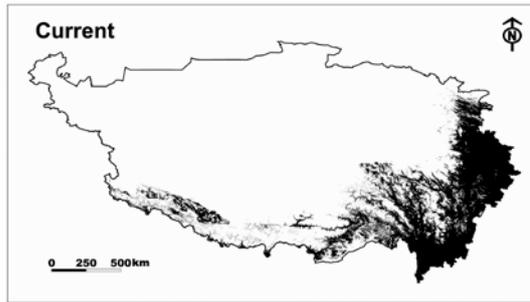

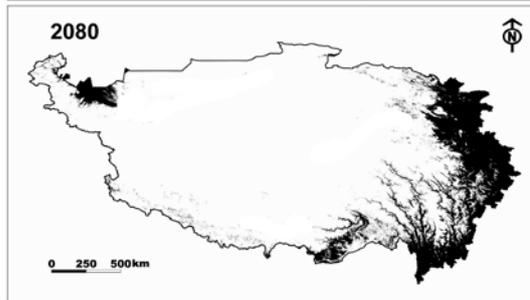

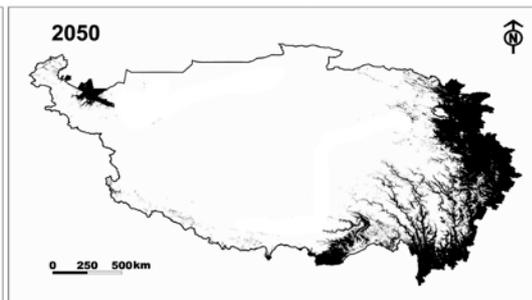

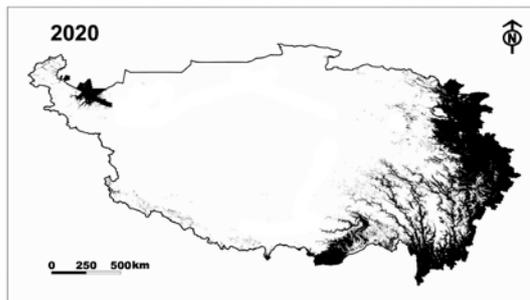

FIG. B13. Occurrence records, Jack-knife analysis, and potential current and future distributions under full and zero dispersal hypotheses of Reeves's muntjac (*Muntiacus reevesi*).

Chinese goral (*Naemorhaedus caudatus*)

(a) Current

(b) Full dispersal hypothesis

(c) Zero dispersal hypothesis

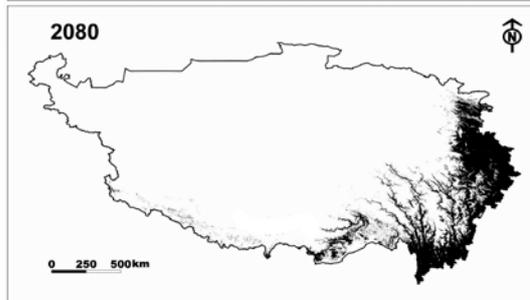

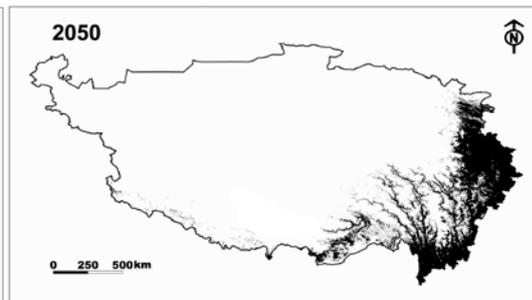

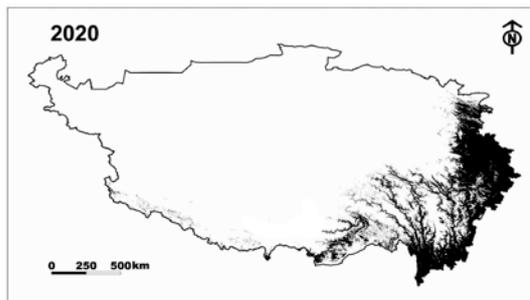

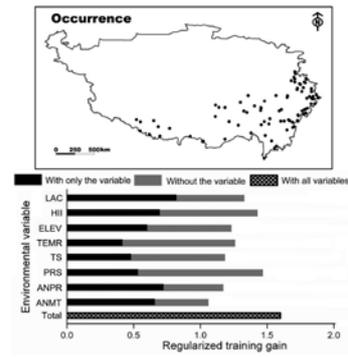

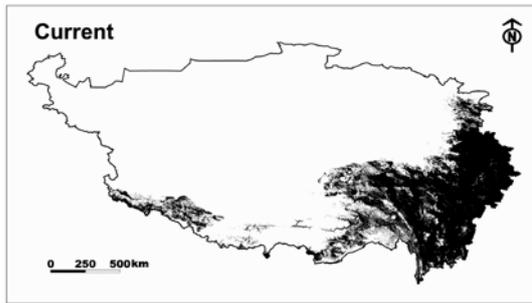

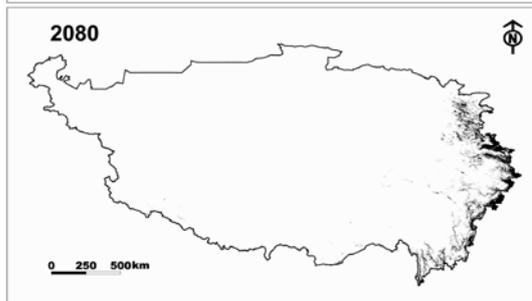

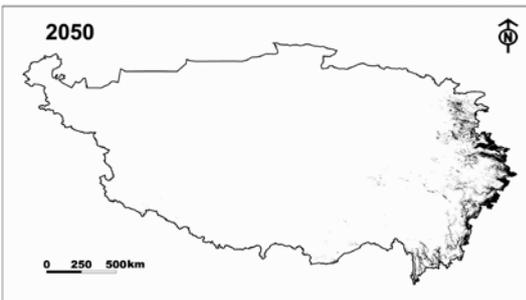

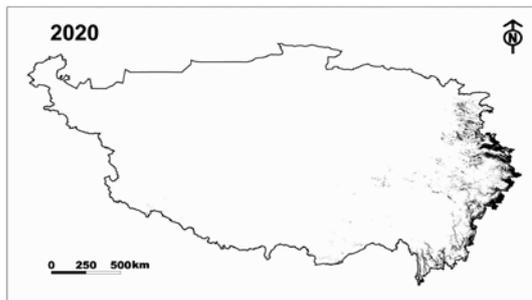

FIG. B14. Occurrence records, Jack-knife analysis, and potential current and future distributions under full and zero dispersal hypotheses of Chinese goral (*Naemorhedus caudatus*).

**Serow (*Naemorhaedus sumatraensis*)**

**(a) Current**

**(b) Full dispersal hypothesis**

**(c) Zero dispersal hypothesis**

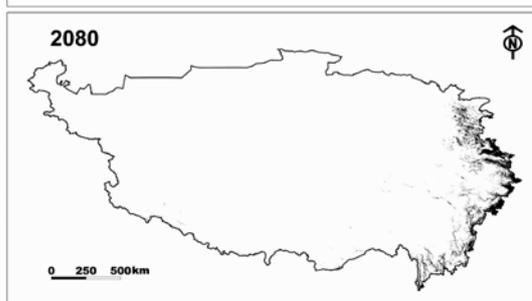

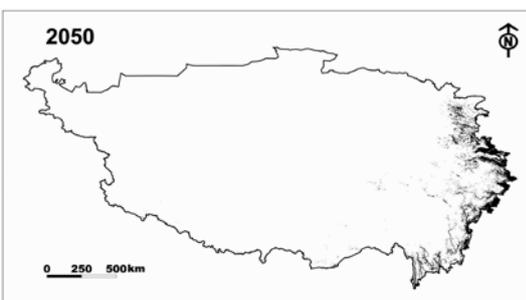

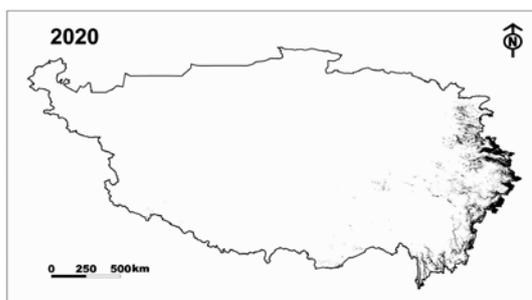

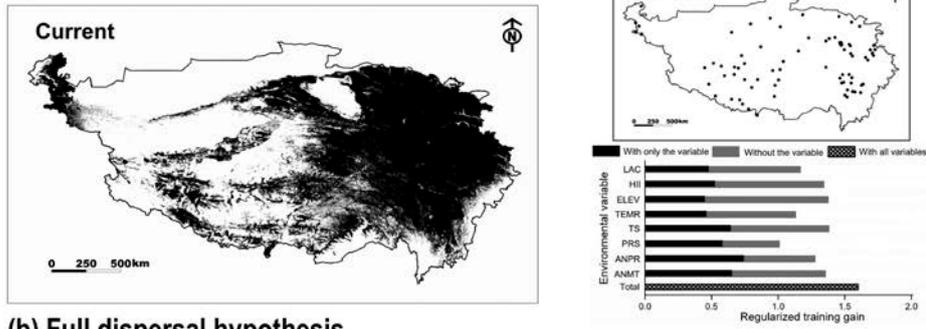

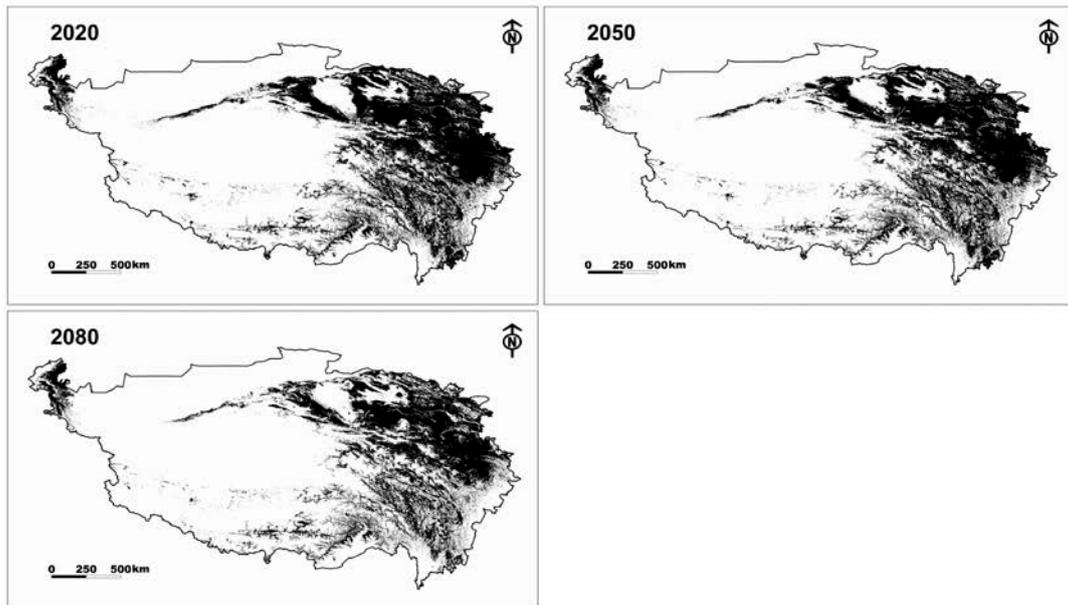

FIG. B15. Occurrence records, Jack-knife analysis, and potential current and future distributions under full and zero dispersal hypotheses of Serow (*Naemorhedus sumatraensis*).

**Argali (*Ovis ammon*)**

**(a) Current**

**(b) Full dispersal hypothesis**

**(c) Zero dispersal hypothesis**

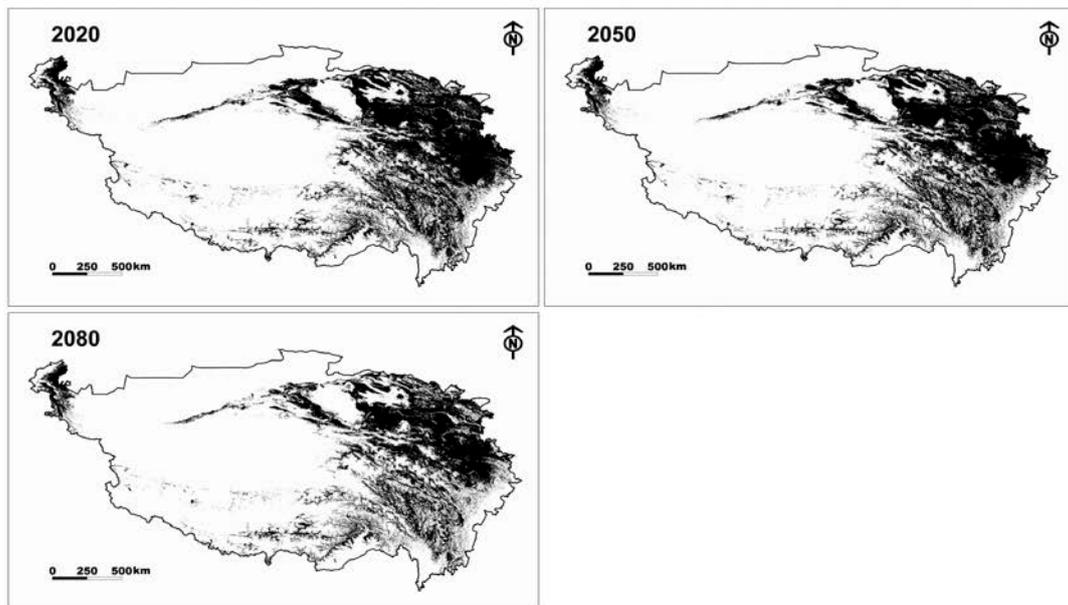

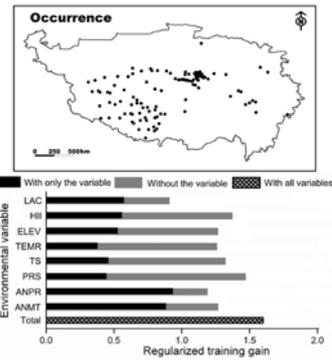

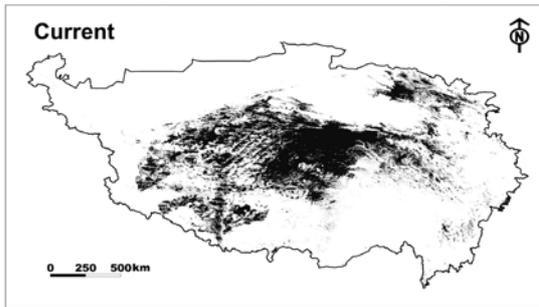

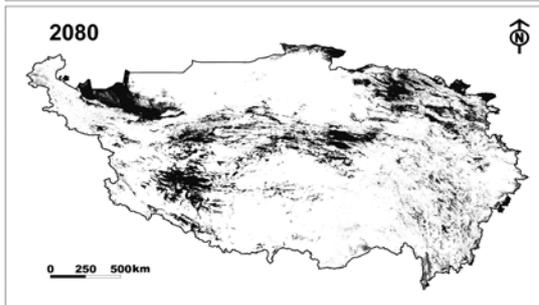

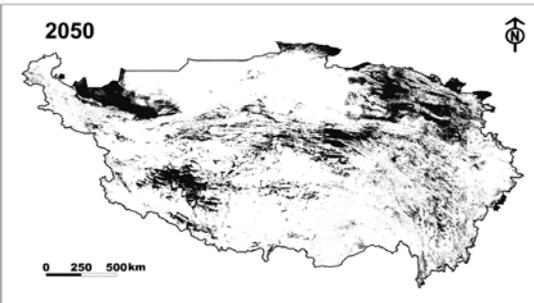

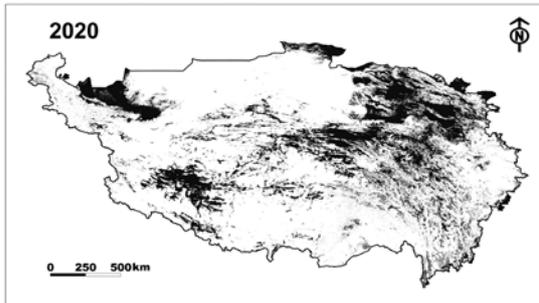

FIG. B16. Occurrence records, Jack-knife analysis, and potential current and future distributions under full and zero dispersal hypotheses of Argali (*Ovis ammon*).

**Chiru (*Pantholops hodgsonii*)**

**(a) Current**

**(b) Full dispersal hypothesis**

**(c) Zero dispersal hypothesis**

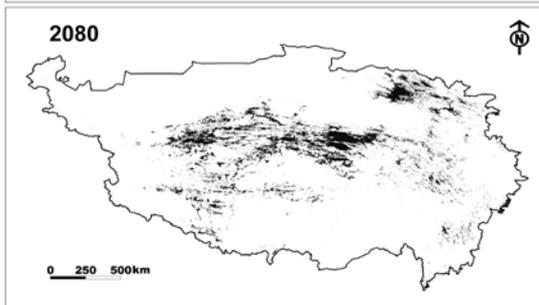

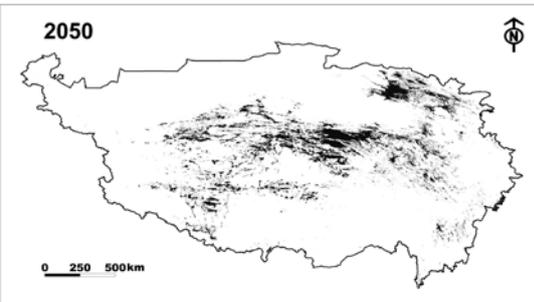

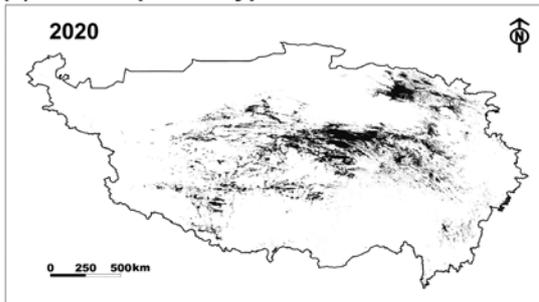

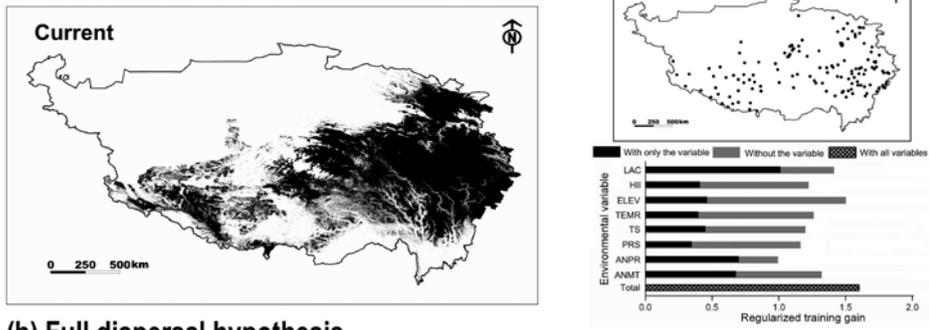

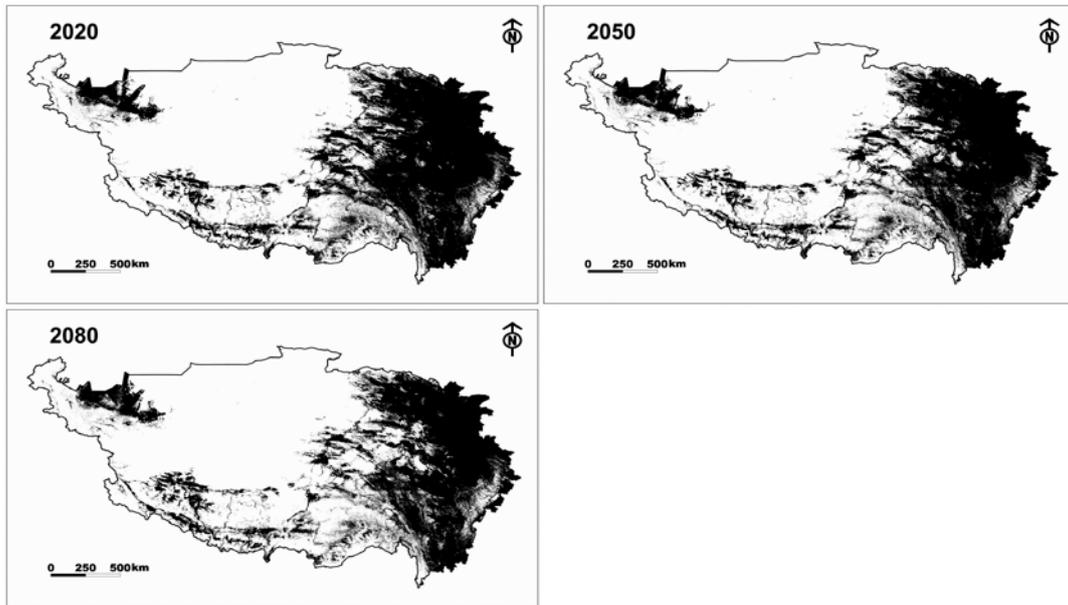

FIG. B17. Occurrence records, Jack-knife analysis, and potential current and future distributions under full and zero dispersal hypotheses of chiru (*Pantholops hodgsonii*).

Tibetan gazelle (*Procapra picticaudata*)

(a) Current

(b) Full dispersal hypothesis

(c) Zero dispersal hypothesis

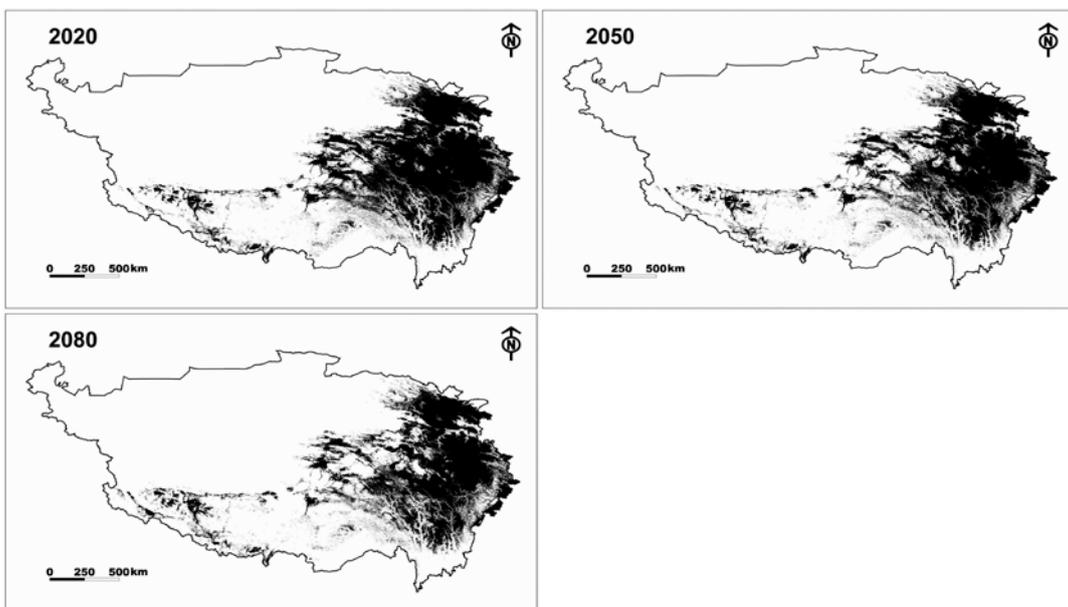

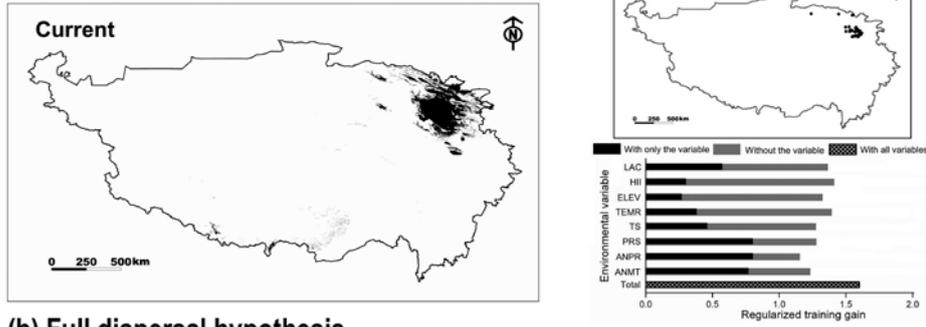

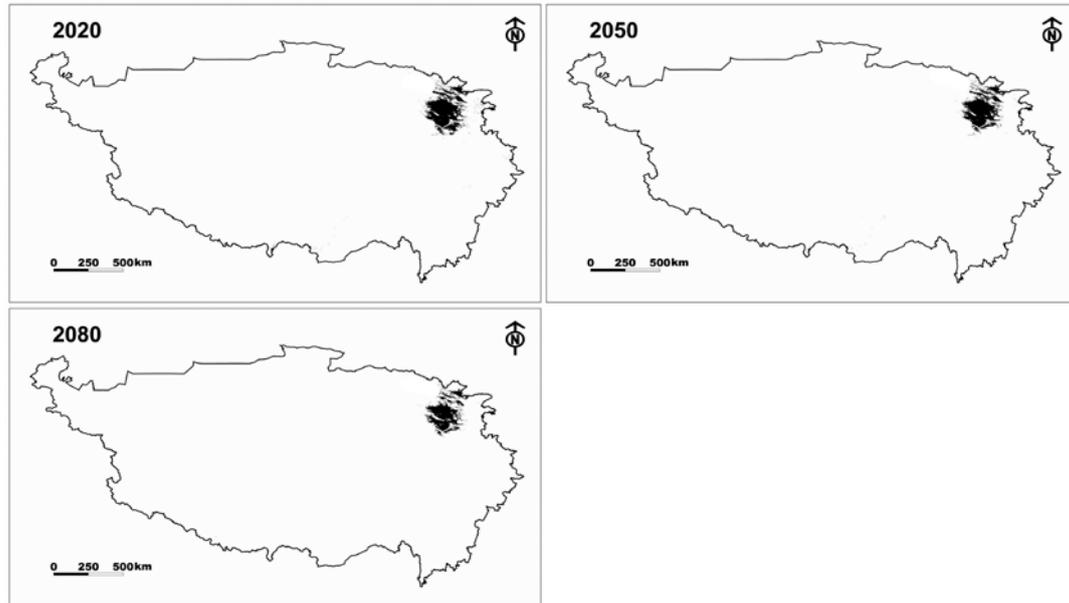

FIG. B18. Occurrence records, Jack-knife analysis, and potential current and future distributions under full and zero dispersal hypotheses of Tibetan gazelle (*Procapra picticaudata*).

**Przewalski's gazelle (*Procapra przewalskii*)**

**(a) Current**

**(b) Full dispersal hypothesis**

**(c) Zero dispersal hypothesis**

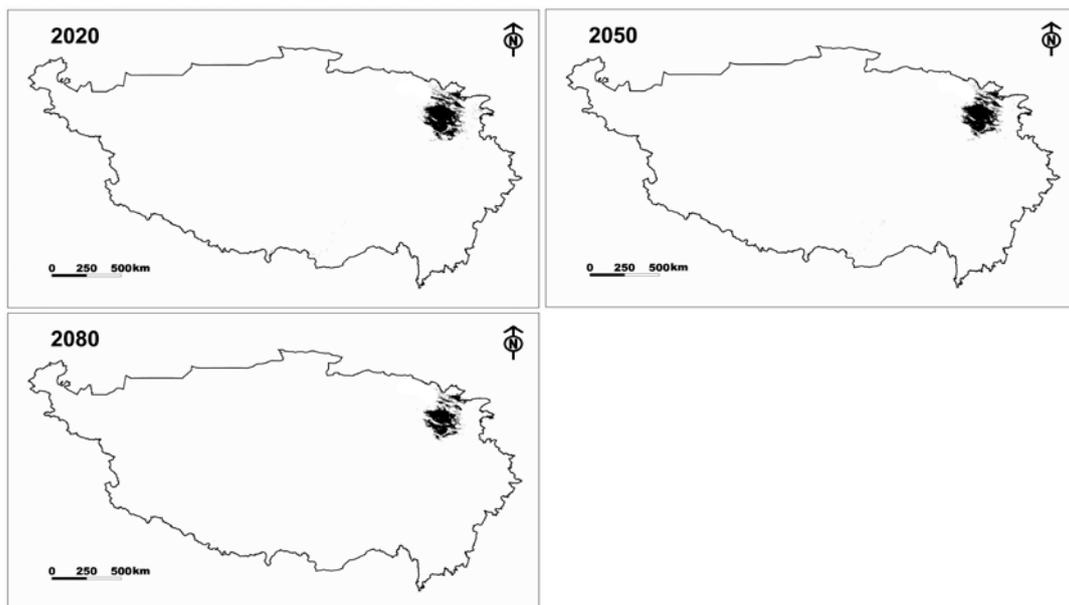

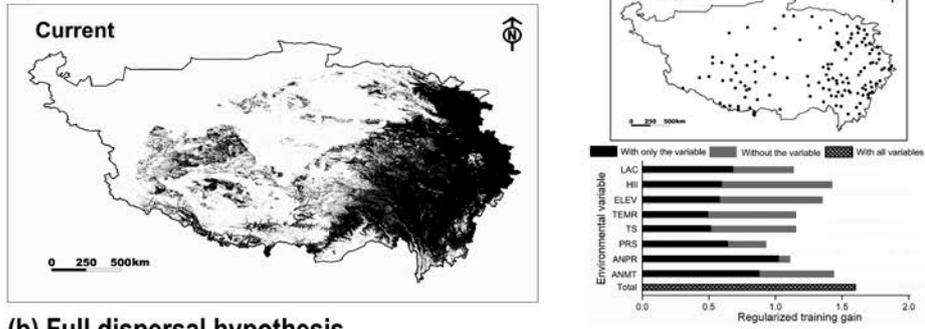

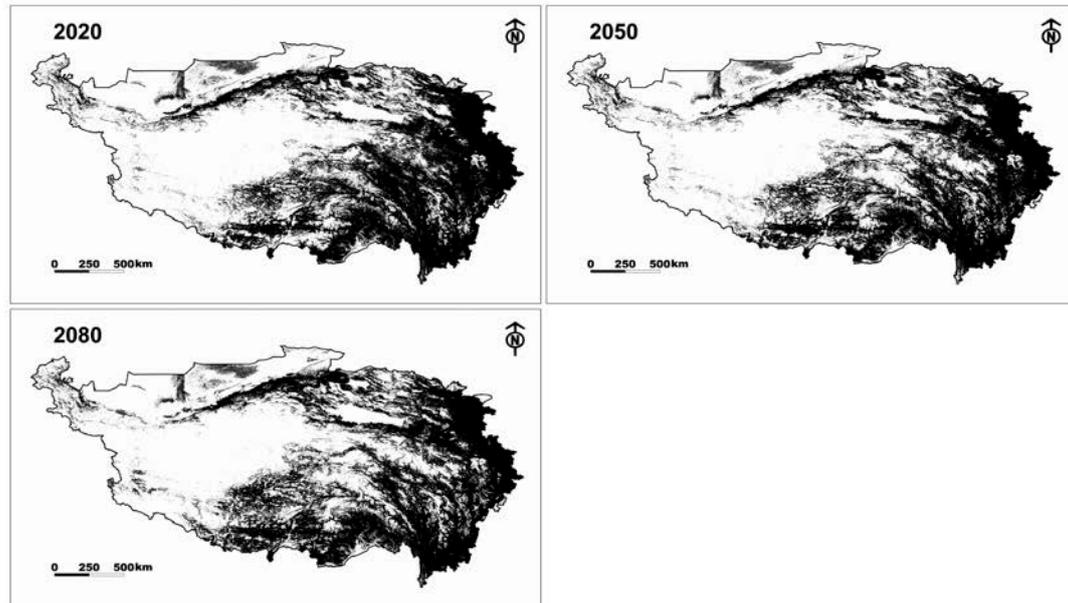

FIG. B19. Occurrence records, Jack-knife analysis, and potential current and future distributions under full and zero dispersal hypotheses of Przewalski's gazelle (*Procapra przewalskii*).

**Bharal (*Pseudois nayaur*)**

**(a) Current**

**(b) Full dispersal hypothesis**

**(c) Zero dispersal hypothesis**

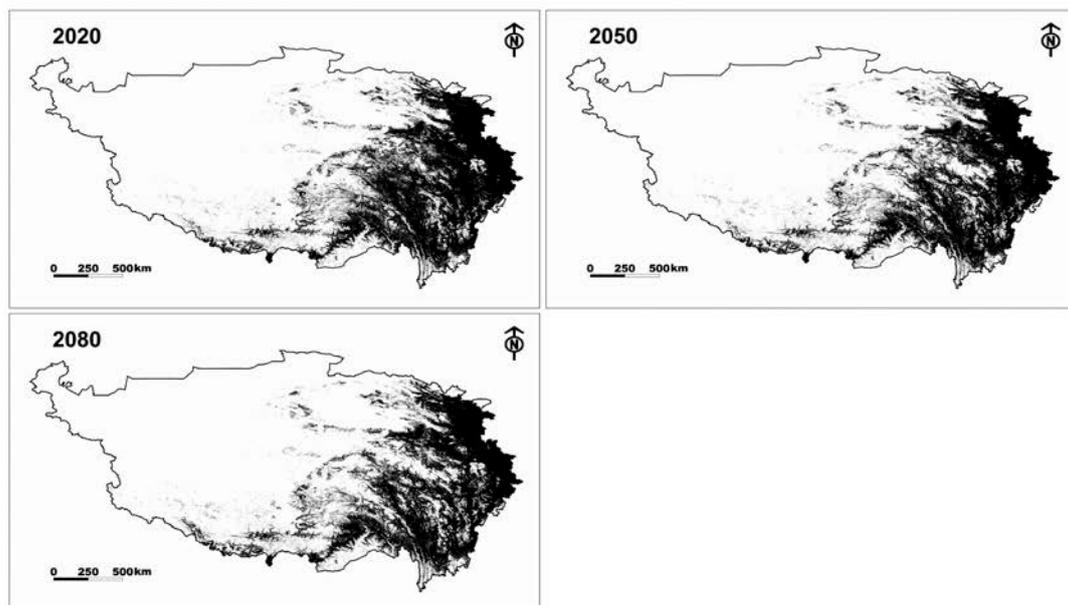

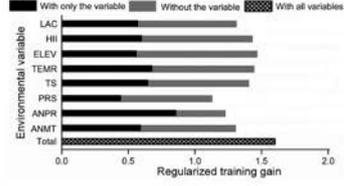

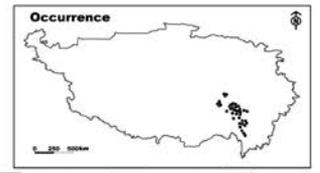

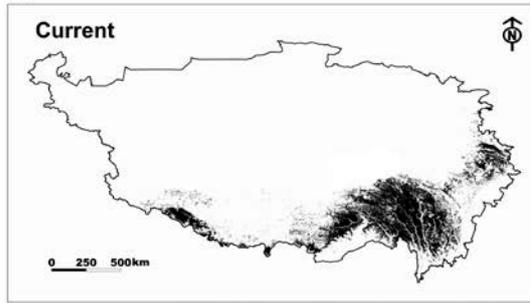

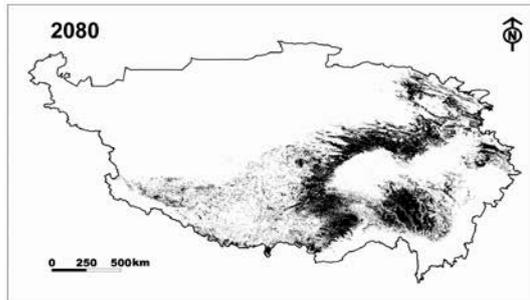

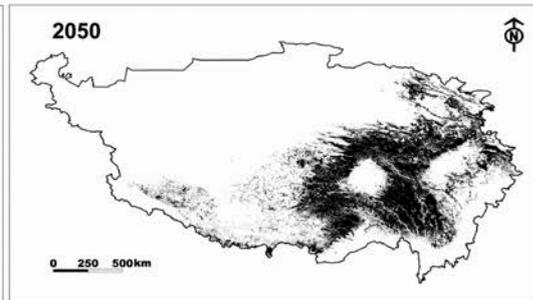

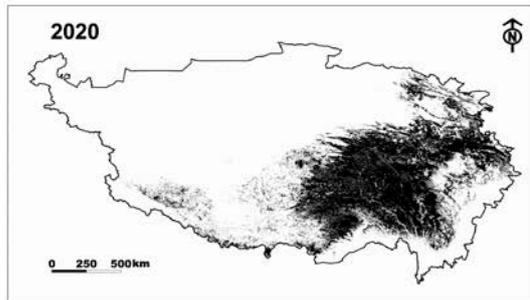

FIG. B20. Occurrence records, Jack-knife analysis, and potential current and future distributions under full and zero dispersal hypotheses of bharal (*Pseudois nayaur*).

**Dwarf bharaI (*Pseudois schaeferi*)**

**(a) Current**

**(b) Full dispersal hypothesis**

**(c) Zero dispersal hypothesis**

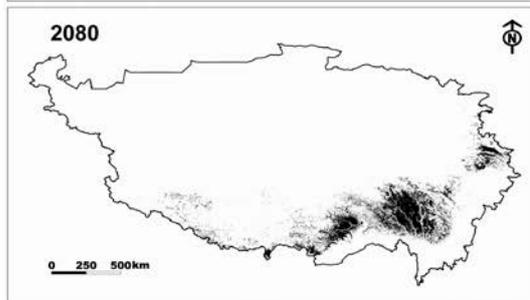

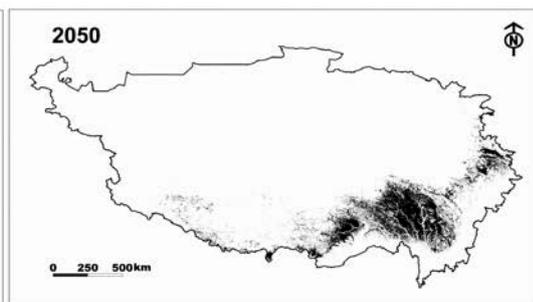

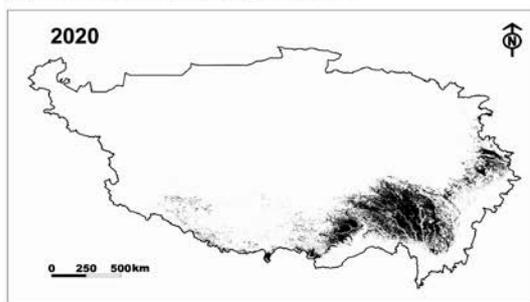

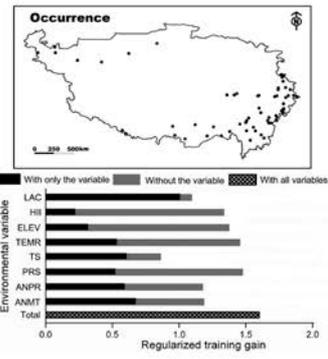

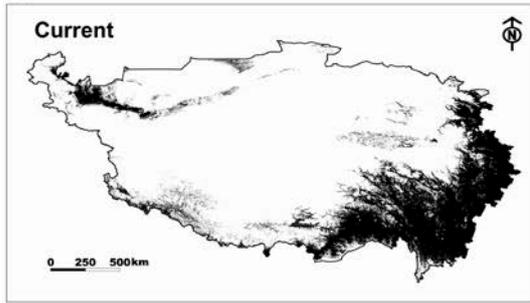

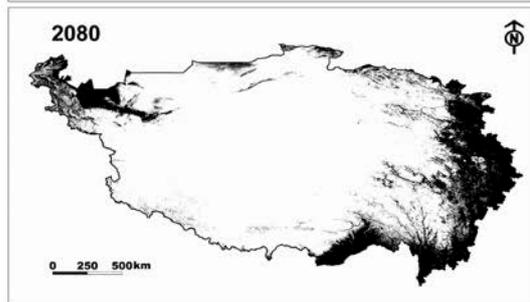

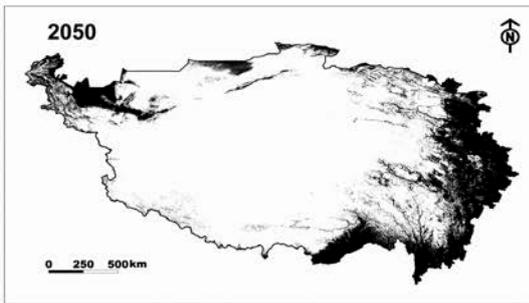

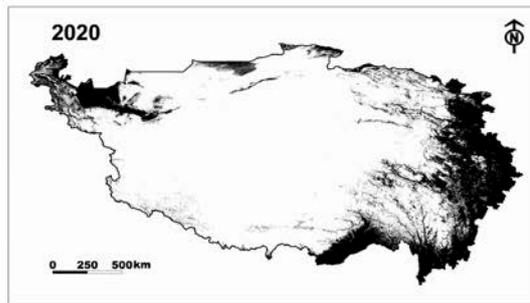

FIG. B21. Occurrence records, Jack-knife analysis, and potential current and future distributions under full and zero dispersal hypotheses of dwarf bharaI (*Pseudois schaeferi*).

**Wild boar (*Sus scrofa*)**

**(a) Current**

**(b) Full dispersal hypothesis**

**(c) Zero dispersal hypothesis**

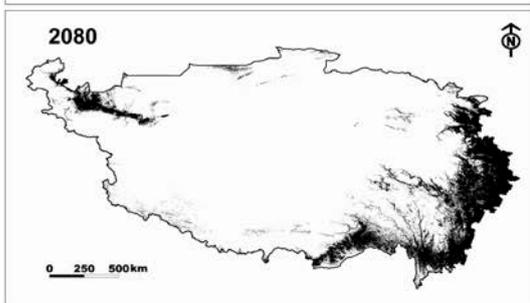

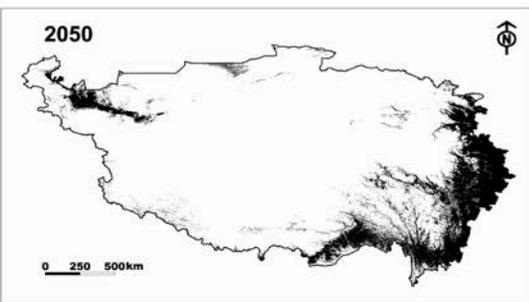

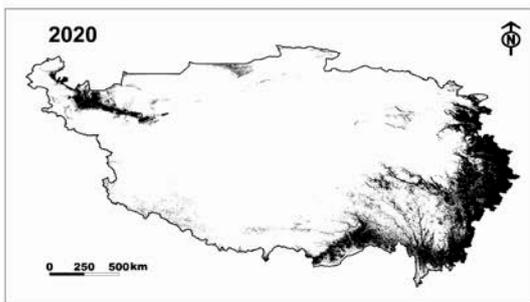

FIG. B22. Occurrence records, Jack-knife analysis, and potential current and future distributions under full and zero dispersal hypotheses of wild boar (*Sus scrofa*).
