

A late-Quaternary vegetation history
from Hanging Lake, northern Yukon

Les C. Cwynar

Ecological Monographs 52(1)

March 1982

The following is a listing of the raw pollen counts, level by level, for Hanging Lake. Ambrosia pollen was not included in the sums that I used in creating the pollen diagrams because it is a contaminant of the Eucalyptus tablets and its presence in samples can be entirely explained by this source.

All samples had a volume of 1 cc and 3 Eucalyptus tablets were added to each sample.

The following abbreviations have been used in the listing:
