

Bergner S, Halec G, Schmitt M, Aubin F, Alonso A, Auvinen E:

Individual and complementary effects of human papillomavirus oncogenes on epithelial cell proliferation and differentiation

Cells Tissues Organs

Fig. S6. Expression of involucrin and cytokeratin 14 in HPV 16 harboring raft cultures. Paraffin sections were stained with antibodies to involucrin expressed in terminally differentiated cells (green), and cytokeratin 14 (K14; red), which is expressed in undifferentiated cells. Nuclei were stained with DAPI (blue). Magnifications are given of selected areas in HPV16wt. The size bar represents 50 μm .
