

Bergner S, Halec G, Schmitt M, Aubin F, Alonso A, Auvinen E:

Individual and complementary effects of human papillomavirus oncogenes on epithelial cell proliferation and differentiation
Cells Tissues Organs

Fig. S3. Detection of wild-type and mutant HPV 16 DNA and E1[^]E4 transcription by PCR. The presence of episomal HPV 16 DNA was shown by conventional PCR. β -globin was used as a technical control for PCR. The presence and correct splicing of E1[^]E4 transcripts was shown by RT-PCR. β -actin was amplified in parallel for control.
