Final set of metrics

Metrics	Description	Scale
GENERALITIES	Description	Seale
Projects		
Development type	The app to be developed is new or already existing	New - Enhancement
Budget for the project	The total budget of the project	True / False
Defined deadline	The customer indicates a specific delivery date	True / False
User Target	Application recipient	Consumers - Business - Employees
Requirements Analysis Support Security Analysis Support	If the user requires support for the identification of the application requirements If the user requires support for the identification of security requirements	True / False True / False
Security Analysis Support If the user requires support for the identification of security requirements True / Faise Platform		
Target platform	The type of platforms for which the app needs to be developed	Andoid - iOS - Windows phone - Other
Platform type	If the application is developed with proprietary	·
	libraries of the chosen platform or not	Native - hybrid
Backward compatibility	Support for previous versions of the selected platform	True / False
Tablet support	If the application should be optimized for other devices like tablets, iPad	True / False
Smartwatch support	If the application should be optimized for other devices like smartwatch	True / False
Multilingual support	The application translation with additional languages	True / False
Design		
User Interface	The level of details of the GUI	Basic -Stosk - Polished
FEATURES		
Size		N 1 C
Static Views	Number of static pages in the app	Number of Number of
Dynamic Views	Number of dynamic pages in the app	Number of
Accounting Ad hoc authentication Implementation of a registration		
Ad not authentication	and authentication module	True / False
User Profiles	Functionality which enable the possibility	
Osci Fronces	for a user to have his own profile	True / False
Third party authentication	Implementation of a login form based	
Table Party and an arrangement	on social media credentials	Number of
User Features		
Manipulation	Functionality which enable the possibility	True / False
	for a user to manipulate the contents produced through the app	True / raise
Search	Functionality which enable the possibility	True / False
	for a user to search contents in the application	
Media uploading	Functionality which enable the possibility for a user	True / False
M II I I I	to upload media, such as videos and photos	,
Media manipulation	Functionality which enable the possibility	True / False
Pamata connection	for a user to manipulate the media uploaded.	
Remote connection Push notification	Functionality which enable the possibility for a user	True / False
1 usii notincation	to receive notifications when the app is closed	Title / Paise
Number of api third part	The app uses external APIs	True / False
Data Storage	The app needs a remote database to store the data	True / False
Wrapper	Translation of an existing service, (e.g., use of contents of a web site)	True / False
	(e.g., use of contents of a web site)	,
Social Aspect		
Messaging	Functionality which enable the possibility for a user to communicate	True / False
	with other users using, as an example, instant messages	
Comments	Comments to the contents of the application,	True / False
0 : 1 1 :	shared between users.	T / F 1
Social sharing	Functionality which enable the possibility for a user to share contents on social networks	True / False
Dates & Location		
Calendaring	The app implements a calendar	True / False
Geolocaization	The app implements a calculate The app is able to geo-localize the users	True / False
Map data	The app uses geographical maps and their data	True / False
Custom map	The app uses custom maps and personalized data	True / False
eCommerce		
Shopping cart	The app implements a shopping cart,	True / False
	enabling users to purchase elements in the app	
Booking	The app implements a booking feature,	True / False
	enabling users to book tickets	
Payment processing	The app implements a process to allow users	True / False
N	to pay directly from the app	
Monitoring Experience Expe		
Analytics	Functionality which enable the possibility for an admin	True / False
Crash Reporting	to visualize statistics about the application Functionality which enable the possibility	True / False
Crash Reporting	for an admin to visualize the history of crashes occurred	iiue / Faise
User feedback	Registration user feedback to an external service.	True / False
Additional Functionality	1008metation and receipant to an external service.	True / Turoc
Number of Functionality	Number of additional functionality requested by the customer	Number of
Average complexity	The average complexity of additional Functionality	Low - Medium - High
	1	9
