S2 Table. The mean N450 amplitudes of the Stroop task under two conditions at two time points in the rTMS and sham rTMS groups.

	mean N450 amplitudes of the Stroop task(uv)			
Group	Congruent		Incongruent	
	T1	T2	T1	T2
rTMS group	9.61 ±4.804	9.24±5.367	6.59±5.754	2.64±5.798 ^f
Sham rTMS group	9.74±5.614	9.23±5.568	6.96±6.313	6.86±6.980

T1, at baseline, before stimulation; T2, immediately after 7 days of rTMS or sham rTMS.

f rTMS vs. sham rTMS: p<0.05.
