

Supplementary figure legends

Supplementary Figure 1 : Penetrance parameters for proposed two-locus model space with specific and broad phenotype.

Supplementary Figure 2 : Genotypes of the members of the family with the greatest contribution to the signal at D8S1110 when conditioning on D10S245. Filled symbols: bipolar disorder; half-filled symbols: major psychosis disorder other than bipolar. Empty symbols: unaffected, except for 759, 797 and 798 whose diagnosis is unknown. Alleles are coded with single digits. Missing genotypes are indicated by 00.
