

Supplementary table 1: Logistic regression models for the association of cross-sectional high AC z-score (>90th centile) and high AC z-velocity (highest decile) with LGA and macrosomia.

Outcome	Model	Naegelkerke R ²	Parameter	B	OR	IC 95%		p*
LGA	High AC z-score plus high AC z-velocity	0.153	High AC z-score 32w	2.14	8.47	6.17	11.62	<0.001
			High AC z-velocity	0.59	1.81	1.08	3.01	0.024
Macrosomia	High AC z-score plus high AC z-velocity	0.095	High AC z-score 32w	1.7	5.48	3.99	7.53	<0.001
			High AC z-velocity	0.24	1.27	0.74	2.19	0.389
