

Supplementary Information

Habitat variables associated with encounters of Hottentot Buttonquail *Turnix hottentottus* during flush surveys across the Fynbos biome

Alan TK Lee, Dale R Wright and Brian Reeves

Ostrich 2018, 89(1): 13–18. DOI: 10.2989/00306525.2017.1343209

Table S1: A summary of the covariates (untransformed) from the habitat plots associated with the survey for Hottentot Buttonquail across the fynbos biome.

Covariate	Median	Minimum	Maximum
Altitude (m)	984	18	1866
Erica cover (%)	10	0	50
Protea cover (%)	5	0	80
Restio cover (%)	30	0	90
Daisy cover (%)	10	0	75
Grass cover (%)	10	0	90
Other veg cover (%)	20	0	100
Total veg cover (%)	70	0	100
Slope (degrees)	4	0 (flat)	70
Heterogeneity	5	1	6
Time since fire (years)	6	0	50
