

**Table S1:** Worst corrected visual acuity and inflammatory signs recorded during follow-up in three affected eyes of two patients from a cohort of children and adolescents with non-infectious intermediate uveitis that received no treatment.

	Patient 13, right eye	Patient 13, left eye	Patient 14, right eye
Total follow-up (years)	1.0	1.0	6.2
Corrected visual acuity (LogMAR)	0	0.05	0
Cells in anterior chamber	0	0.5+	0.5+
Vitreous haze	0.5+	0.5+	1+
Snowballs	Yes	Yes	Yes
Snowbanks	No	No	Yes
Peripheral vasculitis	No	No	No
Papillitis	No	No	No
Cystic macular edema	No	No	No
