

Table S5: Comparison of the incidence rate of remission, relapse, and prolonged remission before or after 2005 in a cohort of children and adolescents with non infectious intermediate uveitis.

	Before 2005	After 2005	Log-rank test p-value
Remission			
IR (95% CI)	14.7 [9.0-24.0]	26.1 [15.7-43.2]	0.11
Episodes, n	16	15	
Time at risk, eye-years	109.0	57.6	
Relapse			
IR (95% CI)	28.1 [14.1-56.2]	36.3 [20.1-65.6]	0.97
Episodes, n	8	11	
Time at risk, eye-years	28.5	30.3	
Prolonged remission			
IR (95% CI)	8.8 [4.4-17.5]	4.6 [1.7-12.2]	0.19
Episodes, n	8	4	
Time at risk, eye-years	91.3	87.2	

CI: Confidence interval; IR: incidence rate.
