

Suppl 2. Overview of ProMED-mail reports of viral diseases in Indonesia

N/A: no information available from the original report (i.e. the number of fatal cases was not mentioned)

Unknown: information is available, but not specified (i.e. a lab test was performed, the used assay was not mentioned)

At least (number): no exact information about numbers was available from the original report

Note: due to overlapping reports (same case described multiple times) or multiple cities/regions in one report, double entries exist and reports are grouped.
