Supplementary Information 1. PRagmatic Explanatory Continuum Indicator Summary-2 (PRECIS-2) wheel for the design and implementation of a pilot cluster randomized controlled trial on a carepath for obese pregnant women

Results are for the design and implementation of the pilot cluster randomized controlled trial of a carepath for obese pregnant women, which were identical. PRECIS-2 wheels of design and implementation are superimposed.

1: Very explanatory; 2: Rather explanatory; 3: Equally pragmatic and explanatory; 4: Rather pragmatic; 5: Very pragmatic; hcp: health care provider

Using the PRagmatic Explanatory Continuum Indicator Summary-2 Tool, across all nine domains, this trial was assessed to be either "rather pragmatic" or "very pragmatic", in contrast to an "explanatory trial".
