**S4 Fig. Inheritance of the alleles of TSRF161 and GSR5112 linked with** *MS-P1* in **'Kara' ancestors**. Genotypes of simple sequence repeat markers and classes of organelle genotype (CT) were sourced from a previous report (Shimizu et al. 2016). The alleles derived from kunenbo are indicated in bold. \*: Allele "227" at GSR5112 could not be estimated because the genotypes at GSR5112 were the same in Satsuma and King. CT: classes of organelle genotype.
