Working live graphics at: <http://areff2000.github.io>

Ferrers (2016). Figure 3. Value Flower: a multi-dimensional dynamic value analysis tool
Software (D3 generated) available at: <https://dx.doi.org/10.6084/m9.figshare.3425663.v1>

In Ferrers (2016). [The NBN Brownfields Debate: valuing FTTN and FTTP](http://dx.doi.org/10.18080/ajtde.v4n2.55). Australia Journal of Telecommunications and Digital Economy. Available at: <http://dx.doi.org/10.18080/ajtde.v4n2.55>

My research: How to measure/manage value creation?

My study of Innovation led me deeper to consider the value creation aspects of innovation. What is value? How does value arise? How to measure and manage value? Is a value perspective a better focus than profit for companies or GDP for nations?

My digital toolbox

- Php, mysql, Cloud server, html, Sequel Pro
- D3 datavis, nationalmap.gov.au, aurin.org.au (maps)

I've got my eyes on: Jupyter Notebook

I want to keep an online diary of analysis of my Nectar MySQL DB. <http://118.138.240.130/>.

My favourite tool: Whiteboard, Network Map

Wide open spaces for organising and brainstorming.

Research SOS

It would be great if NeCTAR/someone had some easy to follow walkthroughs to get a software stack up and running; public/private key, apache, php, mysql, visual sql creator, Jupyter notebook, datavis front end etc etc etc.
