

**FIGURE S5. Density plots of cell size distributions from *sfp1Δ* and *cln3Δ* cells.** The deletion mutants of a prototypical *whi* (*sfp1Δ*) and *lge* (*cln3Δ*) were analyzed based on the data from (Jorgensen et al. 2002). On the y-axis are the density frequency values, while on the x-axis are the cell size bins, encompassing the cell size values shown in the corresponding spreadsheet associated with this plot (see Supplementary File 1).
