

S1 Table

Parameters for the gamma distribution of meat consumption

Gamma distribution, $\text{Gamma}(\alpha, \beta)$ from which the consumption of meat in g/meal is derived.

Weight class	Males	Females
Low	(2.551, 0.016)	(2.483, 0.022)
Medium	(2.549, 0.015)	(2.649, 0.022)
High	(2.513, 0.014)	(2.829, 0.022)
