Supplemental Table 3. Means (SE) of household dysfunction and physical/emotional abuse in childhood across groups

Indicator	Class 1 High Stress-Low Support	Class 2 Moderate Stress-Moderate Support	Class 3 Low Stress-High Support
Household dysfunction	.14 (.02)^{ab}	.18 (.01)^{a}	.15 (.01)^{b}
Physical/Emotional Abuse	1.65 (.07)^{a}	1.45 (.02)^{b}	1.34 (.01)^{c}

SE= Standard Error.

NOTE. Means with different superscripts indicate significant differences among means $p<.05$. For household dysfunction, there is a significant difference between class 2 and class 3. For physical/emotional abuse, class 1, 2, and 3 are all statistically different from each other.
