

A

Strain	Class A beta lactamase	Class C beta lactamase
DK2	PSB80478.1	PSB80374.1
DK3	PSB78632.1	PSB84194.1
DK20	PSB84253.1	PSB89229.1
DK29	PSB91507.1	PSB86888.1

B

**Supplementary Figure S3.** (A) GenBank Accession numbers of the putative beta lactamase genes encoded within the genomes of *P. damsela* subsp. *damsela* strains DK2, DK3, DK20 and DK29. (B) E-test for benzylpenicillin sensitivity reveals that the four *P. damsela* subsp. *damsela* strains sequenced in this study are resistant to this antimicrobial. The four strains were found to carry two genes encoding putative  $\beta$ -lactamases within their genomes.
