The Last Five Years... will it go up again?

Caveats

- Numbers are indicative only.
- If there is a signal it can be visualized and measured. Not all signal gets captured. Not all signal is online nor on Twitter nor tagged with a hashtag.
- These numbers also reflect the methods used in collecting the data and this includes the settings used in the specific tools (Twitter Archiving Google Spreadsheet, an open source app created by Martin Hawksey) and Voyant Tools (by Stefan Sinclair and Geoffrey Rockwell).
- Source data may need refining and deduplication.
- Data was collected live at the time of each event.
- Archiving and sharing this data follows Twitter's Term and Conditions and Developers' Rules of the Road at the time of archiving.
- No personally-identifiable nor sensitive personal data has been shared in this report.
- Top Terms obtained Voyant Tools with English stop words filters applied, also excluding Twitter and conference specific terms and focusing on 'meaningful' terms.
