COMMUNITY:

ORCID implementation and adoption in Europe continues to grow. Our focus for this year is building sustainable communities of practice, and we have updated our consortium policy to better articulate how we work with you to support these communities.

Europe forms 50% of our global member community. We are in active discussions with several potential new consortia and members in Europe, including engaging with communities in Eastern Europe and Russia.

Our main focus is to support sustainable integrations that enable trusted assertions of affiliations, funding information, works, and more. All existing integrations are being mapped to our Collect & Connect program and badges are being awarded — and updated yearly — as applicable. New integrations must meet the requirements for the Authenticate and Display badges.
