

How many AGU articles are mentioned in Wikipedia?

For AGU 2018, the scientific meeting

- Not many articles from JGR make it onto Wikipedia (even though the archive is open access from 1997 to 24 months ago).^[1]

Geophysical Research Letters (GRL) case study

- Out of 36,960 GRL articles, 921 have been mentioned in Wikipedia (2.5%).^[2] This is negligible, especially compared to Twitter mentions!
- Wikipedia mentions to GRL articles are spread across 762 Wikipedia pages.
- Some Wikipedia pages reference multiple GRL articles: for example 'Cluster II (spacecraft)' - 25 GRL articles; 'El Niño' - 11 GRL articles.
- Only 18 Wikipedia mentions of GRL articles can unambiguously be assigned to a journal author (this is likely an underestimate).
