

## Supplementary data

**Supplementary Fig. S1. Effects of Hal and Ola in non-AMPH-treated mice in the LIA paradigm.** (a) Horizontal locomotion during habituation to the open field (Veh: n = 8, Hal: n = 8, Ola: n = 8). (b) Light-induced activity in first 5 min interval with stimulation relative to last baseline interval which was taken as 100% in Veh, Hal and Ola treated animals. n.s. not significant
